

# IMAGERY RE-SCRIPTING

**1. Connect with the image:** Plan where in the image you will connect; ensure that this is before the trauma event.

*Tell me about what's happening? What are you seeing? What are you feeling? What is happening in your body?*

**2. Connect with the physiological and cognitive experience:**

*What are you feeling? Where is that in your body? What are you thinking? What is running through your mind?*

**3. Connect to needs**

*What do you need? What would you like to happen in this image? What would be helpful?*

**4. Bring the therapist into the image:**

*Can you bring me into the image with little... now? Where am I? Watch me walk to you and sit next to you now.*

**5. Attune to the Vulnerable Child (VCM):**

*What are you feeling? What's happening in your body? What are you thinking?*

**6. Meet the child's needs - what would a good parent do? Soothe, provide safety, confront the abuser, and address the schema. \*\*Ensure that safety is not created in a manner that maintains maladaptive coping responses that connect to offending behaviour:**

*I want you to see something different. I want you to see me walk into that room and stand between you and your father/mother. I walk in and hold little .... and say 'I'm here now and I will keep you safe'. I want you to see our safety bubble keeping us safe now. Only those that you want can enter, and no harm can come to us in here, can you see it? Can you feel how strong it is? We can see what's outside, but others cannot see us in here, not unless we want them to. Test it, if you ... want? nothing will break the safety bubble.*

**7. Confront the antagonist**

*"X, I won't let you hurt little .... anymore, I won't let you hurt anyone else in this house anymore. You need to take responsibility for your behaviours and get the right help. This stops now."*

**8. Continue until the exchange has been won."**

*What you are doing hurts little... and the rest of the family. You can't break this protective shield around us now, I will say it again, you need to take responsibility for your behaviours and get help. We are leaving without you to a safe place. The help you need is coming and you won't be able to hurt little ... anymore"*

**9. Check-in:**

*"How does that feel?" "What is it like when I stand up to XT", "Is there anything more that you need?"*

**10. Finish - provide safety and positive image or use safe place imagery**

*Let's go for a walk, read a book, get a milkshake...can you see that...?*

**11. Debrief brings Healthy Adult (HA) into the current life situation:**

*"What was that like? What was the most helpful? What words did VCM hear? What did your healthy adult mode hear?"*

## AT ANY TIME IF A COPING MODE IS PRESENT IN THE IMAGE/ PREVENTING THE IMAGERY

**4. Catch any coping mode that might be interfering with affect - speak directly or ask the client to speak to the coping mode:**

*I think that your detached protector (DP) has just shut you down. Can you talk to him/her and ask why they jumped in? DP I can see you have just shut client down, what are you afraid of?*

**5. Negotiate:**

*Remember it's safe here. Do you need anything in order to let us do the imagery work? Remember we have a safe place we can go to any time we need it?*

**6. Attune to VCM in the earlier memory:**

*Now that the coping mode is going to give us some space, I want to hear from little.... What's happening? What are you seeing? What are you feeling?*
