Beeline Shalini Shankar, 2019-04-30 An anthropologist uses spelling bees as a lens to examine the unique and diverse traits of Generation Z and why they are destined for success At first glance Generation Z youth born after 1997 seems to be made up of anxious overachievers hounded by Tiger Moms and constantly tracked on social media One would think that competitors in the National Spelling Bee the most popular brain sport in America would be the worst off

Counterintuitively anthropologist Shalini Shankar argues that far from being simply overstressed and overscheduled Gen Z spelling bee competitors are learning crucial twenty first century skills from their high powered lives displaying a sophisticated understanding of self promotion self direction and social mobility Drawing on original ethnographic research including interviews with participants judges and parents Shankar examines the outsize impact of immigrant parents and explains why Gen Z kids are on a path to success Hyper Education Pawan Dhingra,2020-04-28 An up close look at the education arms race of after school learning academic competitions and the perceived failure of even our best schools to educate children Beyond soccer leagues music camps and drama lessons today s youth are in an education arms race that begins in elementary school In Hyper Education Pawan Dhingra uncovers the growing world of high achievement education and the after school learning centers spelling bees and math competitions that it has spawned It is a world where immigrant families vie with other Americans to be at the head of the class putting in hours of studying and testing in order to gain a foothold in the supposed meritocracy of American public education A world where enrichment centers like Kumon have seen 194 percent growth since 2002 and target children as young as three Even families and teachers who avoid after school academics are getting swept up Drawing on over 100 in depth interviews with teachers tutors principals children and parents Dhingra delves into the why people participate in this phenomenon and examines how schools families and communities play their part Moving past Tiger Mom stereotypes he addresses why Asian American and white families practice what he calls hyper education and whether or not it makes sense By taking a behind the scenes look at the Scripps National Spelling Bee other national competitions and learning centers Dhingra shows why good schools good grades and good behavior are seen as not enough for high achieving students and their parents and why the education arms race is likely to continue to expand
