

Chapter 13**Genetic Engineering****Section 13–1 Changing the Living World (pages 319–321)**

This section explains how people use selective breeding and mutations to develop organisms with desirable characteristics.

Selective Breeding (pages 319–320)

- What is meant by selective breeding? Only animals and plants with desired characteristics are allowed to produce the next generation.
- Circle the letter of each organism that has been produced by selective breeding.
☒ a. horses ☒ b. dogs ☒ c. cats ☒ d. potatoes
- Who was Luther Burbank? He was a selective plant breeder who developed disease-resistant potatoes to help fight potato blight in Ireland, as well as over 800 varieties of other plants.
- Complete the compare-and-contrast table of types of selective breeding.

SELECTIVE BREEDING

Type	Description	Examples
Hybridization	Crossing dissimilar individuals to bring together the best of both organisms	Disease-resistant Burbank potato
Inbreeding	The continued breeding of individuals with similar characteristics	Maintaining dog breeds

- Is the following sentence true or false? Hybrids are often hardier than either of the parents. true
- What two plant traits did Luther Burbank try to combine in his crosses?
 - Disease resistance
 - Food-producing capacity
- Is the following sentence true or false? To maintain the desired characteristics of a line of organisms, breeders often use hybridization. false
- Most members of a breed are genetically similar.
- What are the risks of inbreeding? There is always a chance that a cross between two individuals will bring together two recessive alleles for a genetic defect.

Reliability Physics and Engineering J. W. McPherson,2010-08-05 All engineers could bene t from at least one course in reliability physics and engineering It is very likely that starting with your very rst engineering po tion you will be asked how long is your newly developed device expected to last This text was designed to help you to answer this fundamentally important question All materials and devices are expected to degrade with time so it is very natural to ask how long will the product last The evidence for material device degradation is apparently everywhere in nature A fresh coating of paint on a house will eventually crack and peel Doors in a new home can become stuck due to the shifting of the foundation The new nish on an automobile will oxidize with time The tight tolerances associated with nely meshed gears will deteriorate with time Critical parameters associated with hi precision semiconductor devices threshold voltages drive currents interconnect resistances capacitor leakages etc will degrade with time In order to

understand the lifetime of the material device it is important to understand the reliability physics kinetics for each of the potential failure mechanisms and then be able to develop the required reliability engineering methods that can be used to prevent or at least minimize the occurrence of device failure

Criminology Gregg Barak, 2009-09-16 Criminology An Integrated Approach is the first criminology textbook to provide an integrated perspective on the developing global and historical relations that unite the studies of criminology criminologists criminal justice justicians and crime crime control in the 21st century In order to achieve this integration the book is divided into three parts Part I a unifying analysis of crime and crime control does three things First the studies of criminology and criminal justice are reunited in the context of globalization Second the official and unofficial forms of crime and criminal behavior are examined domestically and globally Third unlike most criminology texts theories are also used to explain the administration of criminal justice the behavior of law enforcement and crime control as well as the policies of sentencing and punishment Part II explaining criminal behavior and crime outlines the changing historical conditions of criminological inquiry and provides detailed overviews of the various contributions made from economics and law biology psychology and sociology These criminological theories are also subject to a critique based on the partialities of most of these explanations and on the need for developing integrated explanations Part III integrating criminological strands is divided between presenting elaborations of contemporary criminological integrations that transcend disciplinary boundaries and elaborating on both domestic and international policies of crime reduction and justice enhancement in an age of globalization

Biology Cecie Starr, 1994 This streamlined book distills biology's key concepts and connects them to the lives of students with numerous timely applications including compelling new vignettes at the beginning of each chapter Once again Starr created new remarkably clear illustrations to help explain complex biological concepts As with every new edition she continues to simplify and enliven the writing without sacrificing accuracy The author has done a major revision of each chapter so that there is extensive updating and organizational changes to enhance the text's flow As the following features indicate the major thrust of the new edition is to enhance accessibility and further stimulate student interest
