Serving Vulnerable and Marginalized Populations in Social and Educational Contexts Anies Al-Hroub,Sally
Reis,Joseph Madaus,Itab Shuayb,2024-04-26 There is evidence that the global COVID 19 crisis is exacerbating existing
inequalities and marginalization of vulnerable groups including exceptional learners stateless street migrant and refugee
children and youths and the limited use of frameworks of emergency planning with and for marginalized and at risk
individuals These challenges are multi sectoral and intersecting and they require multi and interdisciplinary interventions to
inform inclusive responses These issues include being at a greater risk of excluding vulnerable learners from gaining access
to equitable education online remote and blended education Intersecting forms of discrimination such as gender
socioeconomic and legal status further exacerbate the problem This has alerted us to examine the living conditions of
marginalized and vulnerable populations around the globe and to reveal their experiences problems and needs from an
educational perspective thus bringing insights into their vulnerabilities during the pandemic *Science Books & Films*
,1982 **The Teaching and Learning of Mathematics at University Level** Derek Holton,2006-04-11 This book is the
final report of the ICMI study on the Teaching and Learning of Mathematics at University Level As such it is one of a number
of such studies that ICMI has commissioned The other Study Volumes cover assessment in mathematics education gender
equity research in mathematics education the teaching of geometry and history in mathematics education All of these Study
Volumes represent a statement of the state of the art in their respective areas We hope that this is also the case for the
current Study Volume The current study on university level mathematics was commissioned for essentially four reasons First
universities world wide are accepting a much larger and more diverse group of students than has been the case
Consequently universities have begun to adopt a role more like that of the school system and less like the elite institutions of
the past As a result the educational and pedagogical issues facing universities have changed Second although university
student numbers have increased significantly there has not been a corresponding increase in the number of mathematics
majors Hence mathematics departments have to be more aware of their students needs in order to retain the students they

have and to attract future students As part of this awareness departments of mathematics have to take the teaching and learning of mathematics more seriously than perhaps they have in the past System Arch Wilkinson Shaw,1926
