oriented branches and biology as astoundingly complex fields those structures laden with biochemical detail encompass a deeper theory unifying our knowledge of designed systems Readers will be pleasantly surprised at how lucidly the topics are presented The book offers an indispensable resource for students and professionals working in systems and synthetic biology or any of the various related fields of research

Exploring Opportunities in Green Chemistry and Engineering

Education National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Chemical Sciences Roundtable, 2007-03-12 Going green is a hot topic in both chemistry and chemical engineering Green chemistry is the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances Green engineering is the development and commercialization of economically feasible industrial processes that reduce the risk to human health and the environment This book summarizes a workshop convened by the National Research Council to explore the widespread implementation of green chemistry and chemical engineering concepts into undergraduate and graduate education and how to integrate these concepts into the established and developing curricula Speakers highlighted the most effective educational practices to date and discussed the most promising educational materials and software tools in green chemistry and engineering The goal of the workshop was to inform the Chemical Sciences Roundtable which provides a science oriented apolitical forum for leaders in the chemical sciences to discuss chemically related issues affecting government industry and universities

Perspectives on Mathematics Education

Bent Christiansen, A.G. Howson, Michael Otte, 1986 BACOMET cannot be evaluated solely on the basis of its publications It is important then that the reader with only this volume on which to judge both the BACOMET activities and its major outcome to date should know some thing of what preceded this book s publication For it is the story of how a group of educators mainly tutors of student teachers of mathematics com mitted themselves to a continuing period of work and self education The concept of BACOMET developed during a series of meetings held in 1978 79 between the three editors Bent Christiansen Geoffrey Howson and Michael Otte at which we expressed our concern about the contributions from mathematics education as a discipline to teacher education both as we observed it and as we participated in it The short time which was at the teacher educator s disposal allied to the limited knowledge and experience of the students on which one had to build raised puzzling problems concerning priorities and emphases The recognition that these problems were shared by educators from many different countries was matched by the fact that it would be fruitless to attempt to search for an internationally or even nationally acceptable solution to our problems Different contexts and traditions rule this out
