## The Endocrine System

**Introduction:** Hormones are often referred to as "chemical messengers." These tiny messengers are created and released by one organ, and into the bloodstream, and regulate the activity of another organ or cell. For example, adrenaline is created and released by the **adrenal glands**. It is sent into the bloodstream and has impacts on many other organs in our body, such as the heart. Adrenaline can only get heart rate to increase in a stressful situation. The **pituitary glands** and **testes/ovaries** are in completely different body systems, but thanks to hormones these organs can "communicate."

Many organs in the human body have **endocrine glands** and a smaller group of organs that make and release hormones into the bloodstream. These glands can be found throughout the body and collectively make up the **endocrine system**. In this activity, you will read about each endocrine gland, color it, and finally color which hormones it produces.

1. What is a hormone?
2. What is an example of a hormone?
3. Which type of glands make hormones?

**Hypothalamus**

If you've studied the nervous system, you are familiar with the hypothalamus, a part of the brain. The hypothalamus receives information from the brain and bloodstream on the conditions of the body. It responds to this information by creating hormones, which it then sends to the **pituitary gland**, which hangs from the hypothalamus. The pituitary gland either responds to or sends these hormones back to the hypothalamus.

Two hormones that the hypothalamus makes and sends to the posterior pituitary gland are **oxytocin** and **antidiuretic hormone (ADH)**.

1. Color the hypothalamus and label it.

2. Color the pituitary gland and label it.

3. Color the **adrenal glands** and label them. The adrenal glands sit atop the kidneys. Each adrenal gland has two parts: the **adrenal cortex** (outer) and the **adrenal medulla** (inner).

4. Color the **thyroid gland** and label it. The thyroid gland is located in the neck and produces the hormone **thyroxine**.

5. Color the **parathyroid glands** and label them. The parathyroid glands are four small glands located on the thyroid gland. They produce the hormone **parathyroid hormone (PTH)**.

6. Color the **ovaries/testes** and label them. The ovaries are located in the female pelvic region and produce the hormones **estrogen** and **progesterone**. The testes are located in the male pelvic region and produce the hormone **testosterone**.

## Anatomy of the Endocrine System

1. The **hypothalamus** is located below the brain and is part of the endocrine system. It produces the hormone **oxytocin**, which is used for childbirth. For growth, the hypothalamus produces the hormone **growth hormone (GH)**.

2. The **pituitary gland** is located below the hypothalamus and is part of the endocrine system. It produces the hormone **thyroxine**, which is used for metabolism. It also produces the hormone **parathyroid hormone (PTH)**, which is used for bone health.

3. The **adrenal glands** are located on top of the kidneys. Each adrenal gland has two parts: the **adrenal cortex** (outer) and the **adrenal medulla** (inner). The adrenal cortex produces the hormone **cortisol**, which is used for stress response. The adrenal medulla produces the hormone **adrenaline**, which is used for fight or flight response.

4. The **thyroid gland** is located in the neck and produces the hormone **thyroxine**, which is used for metabolism.

5. The **parathyroid glands** are four small glands located on the thyroid gland. They produce the hormone **parathyroid hormone (PTH)**, which is used for bone health.

6. The **ovaries/testes** are located in the female/male pelvic region and produce the hormones **estrogen** and **progesterone** (in females) and **testosterone** (in males).

## **The Endocrine System Physiology Coloring Packet:**

**Physiology Coloring Workbook** Kenneth Axen, Kathleen Vermitsky Axen, 1997 Physiology Coloring Workbook is a breakthrough approach to learning and remembering the body's processes. Written and illustrated by experts who are both research scientists and teachers, it features 250 striking original illustrations that will give students a clear and enduring understanding of physiology. Learning interactively through coloring thoroughly fixes physiological concepts in the mind and takes less time than memorizing from textbooks. Physiological processes are fully explained and complex subjects are approached through the gradual introduction of simple drawings. The authors employ a logical and consistent use of color to convey information; for example, arterial blood is always red, whereas venous blood is blue and capillary blood is violet. Each lesson includes clearly displayed labels and specific coloring instructions. This book is an invaluable and lasting resource for students in disciplines including anatomy and physiology, biology, nursing, physical therapy, and rehabilitation, medical technology, nutrition, physical education, allied health, and health sciences. The 250 plates in the book are organized in the following sections: Homeostasis, The Cell, Transport Mechanisms, Nervous System, Muscle, Cardiovascular System, Renal System, Respiratory System, Gastrointestinal System, Metabolism, Endocrine System, Reproduction. [Human Anatomy & Physiology Coloring Workbook](#) Anderson, 2008-04-25. This valuable student resource is intended for use in the undergraduate human anatomy and physiology class. The latest edition of Human Anatomy and Physiology Coloring Workbook is designed to help students learn introductory anatomy and physiology and is organized to complement the leading texts in the field. Virtually every structure of the human body typically studied in an introductory course is examined. Chapters are short, concise, and complete, enabling the student to master smaller sections of information in a cohesive manner. 2009, 292 pages.

*Workbook to Accompany Understanding Anatomy & Physiology* Gale Sloan Thompson, 2019-10-02. [Mosby's Essential Sciences for Therapeutic Massage - E-Book](#) Sandy Fritz, 2012-04-16. The fourth edition of this science essentials text for massage students features new full-color photos and illustrations along with an easy-to-read conversational style that explains A&P concepts clearly. The book not only helps students learn the information they need to pass certification exams but it also helps them see how scientific content applies to actual practice. This new edition also features a very enhanced Evolve resource package along with new material on boosting your knowledge of nutrition and research, two subjects of growing interest in the massage therapy profession. Clinical reasoning activities included in the workbook section for each chapter promote problem-based learning. Format combining workbook and textbook features gives you immediate review tools in the form of matching exercises, short-answer questions, fill-in-the-blank questions, drawing exercises, and critical thinking questions. Sections on pathologic conditions feature intervention protocols as well as indications and contraindications for therapeutic massage. Expert author Sandy Fritz provides credibility and authority to the

information presented Practical Applications boxes in each chapter enable you to see the way material applies to real practice and supports competency based learning Highly illustrated format features over 700 full color line drawings and photos Updated chapters and artwork have all been revised to reflect the most current industry information and reviewer feedback MTBOK mapping for instructors on the Evolve website includes a mapping document that links the student objectives in the book to the components of the MTBOK New muscle illustrations in Chapter 9 clearly show attachments and actions as well as the relationships between different muscles in composite drawings Coverage of nutrition now in Chapter 12 includes information on the digestive process basics of solid nutrition how vitamins and minerals affect the body and how proper nutrition affects the functions of all systems of the body Enhanced pathology and indications contraindications appendix includes more illustrations to increase your understanding of what you may encounter during practice Improved biomechanics chapter activities that use photos instead of drawings help you better understand and apply gait assessment and muscle testing concepts
