Wong, Felix Knüpling, Mario Kölling, 2018-04-01 Federalism has played a central role in charting educational progress in many countries With an evolving balance between centralization and decentralization federalism is designed to promote accountability standards without tempering regional and local preferences Federalism facilitates negotiations both vertically between the central authority and local entities as well as horizontally among diverse interests Innovative educational practices are often validated by a few local entities prior to scaling up to the national level Because of the division of revenue sources between central authority and decentralized entities federalism encourages a certain degree of fiscal competition at the local and regional level The balance of centralization and decentralization also varies across institutional and policy domains such as the legislative framework for education drafting of curricula benchmarking for accountability accreditation teacher training and administrative

responsibilities at the primary secondary and tertiary levels Given these critical issues in federalism and education this volume examines ongoing challenges and policy strategies in ten countries namely Australia Austria Belgium Canada Germany Italy Spain Switzerland United Kingdom and the United States These chapters and the introductory overview aim to examine how countries with federal systems of government design govern finance and assure quality in their educational systems spanning from early childhood to secondary school graduation Particular attention is given to functional division between governmental layers of the federal system as well as mechanisms of intergovernmental cooperation both vertically and horizontally The chapters aim to draw out comparative lessons and experiences in an area of great importance to not only federal countries but also countries that are emerging toward a federal system

Abbott, 2020-09-01 When Gordon Campbell's Liberal party won a massive majority on the strength of their New Era electoral platform in 2001 the premier's first act was to fulfill his campaign pledge to reduce personal income taxes Big Promises Small Government reveals the consequences of dramatic tax policy changes on social programs arguing for more sustainable taxation Despite sharply declining economic indices the new premier expected that lower taxes would spur investment and growth essentially paying for themselves Instead the precipitous and ideological decision to cut taxes and exempt health and education some 70 percent of the provincial budget from any decrease in expenditures left smaller ministries scrambling to absorb the cuts to maintain a balanced budget The damage was significant This insider recounting of the real world genesis implementation and consequences of a tax policy offers vital lessons to future governments and considerable insight into the role of taxes in society
