Visual Perception Vicki Bruce, Mark A. Georgeson, Patrick R. Green, 2014-08-27 This comprehensively updated and expanded revision of the successful second edition continues to provide detailed coverage of the ever growing range of research topics in vision In Part I the treatment of visual physiology has been extensively revised with an updated account of retinal processing a new section explaining the principles of spatial and temporal filtering which underlie discussions in later chapters and an up to date account of the primate visual pathway Part II contains four largely new chapters which cover recent psychophysical evidence and computational model of early vision edge detection perceptual grouping depth perception and motion perception The models discussed are extensively integrated with physiological evidence All other chapters in Parts II III and IV have also been thoroughly updated

The Reciprocity of Perceiver and Environment Thomas J. Lombardo, 2017-03-27 Originally published in 1987 this title intended to historically reveal through tracing Gibson's development the substance of his views and how they bore upon general philosophical issues in theories of knowledge and to investigate in detail the historical context of Gibson's theoretical position within psychology Though the author has included a history of Gibson's perceptual research and experimentation the focus is to explicate the dynamic abstract form of Gibson's ecological approach His emphasis is philosophical and theoretical attempting to bring out the direction Gibson was moving in and how such changes could restructure the theoretical fabric of psychology He devotes considerable attention to the Greeks Medievalists and the founders of the Scientific Revolution This is because Gibson's theoretical challenge runs deep into the structure of western thought The author's central goal was to set Gibson's ecological theory within the historical context of fundamental philosophical scientific issues

Ecological Perception Research, Visual Communication, and Aesthetics Klaus Landwehr, 2012-12-06 This book tries to apply James J Gibson's ecological

approach to picture perception to questions of visual communication and aesthetics it provides examples from architecture industrial design and the arts to testify the feasibility of this application Additional theoretical analyses partly based on cross cultural and clinical research help supplement Gibson s basic conjecture that picture perception is essentially based on invariants of optical structure rather than interpretation

Understanding Context Andrew Hinton,2014-12-02 To make sense of the world we re always trying to place things in context whether our environment is physical cultural or something else altogether Now that we live among digital always networked products apps and places context is more complicated than ever starting with where and who we are This practical insightful book provides a powerful toolset to help information architects UX professionals and web and app designers understand and solve the many challenges of contextual ambiguity in the products and services they create You ll discover not only how to design for a given context but also how design participates in making context Learn how people perceive context when touching and navigating digital environments See how labels relationships and rules work as building blocks for context Find out how to make better sense of cross channel multi device products or services Discover how language creates infrastructure in organizations software and the Internet of Things Learn models for figuring out the contextual angles of any user experience

The Construction of Cognitive Maps Juval Portugali,1996-03-31 and processes which are exclusive to humans in their encoding storing decoding and retrieving spatial knowledge for various tasks The authors present and discuss connectionist models of cognitive maps which are based on local representation versus models which are based on distributed representation as well as connectionist models concerning language and spatial relations As is well known Gibson s 1979 ecological approach suggests a view on cognition which is diametrically different from the classical main stream view perception and thus cognition is direct immediate and needs no internal information processing and is thus essentially an external process of interaction between an organism and its external environment The chapter by Harry Heft introduces J J Gibson s ecological approach and its implication to the construction of cognitive maps in general and to the issue of wayfinding in particular According to Heft main stream cognitive sciences are essentially Cartesian in nature and have not as yet internalized the implications of Darwin s theory of evolution Gibson in his ecological approach has tried to do exactly this The author introduces the basic terminology of the ecological approach and relates its various notions in particular optic flow nested hierarchy and affordances to navigation and the way routes and places in the environment are learned

How Direct is Visual Perception Jerry A. Fodor,Zenon W. Pylyshyn,198? *Aviation Visual Perception* Randy Gibb,Rob Gray,Lauren Scharff,2016-04-15 Vision is the dominant sense used by pilots and visual misperception has been identified as the primary contributing factor in numerous aviation mishaps resulting in hundreds of fatalities and major resource loss Despite physiological limitations for sensing and perceiving their aviation environment pilots can often make the required visual judgments with a high degree of accuracy and precision At the same time however visual illusions and misjudgments have been cited as the probable cause of

numerous aviation accidents and in spite of technological and instructional efforts to remedy some of the problems associated with visual perception in aviation mishaps of this type continue to occur Clearly understanding the role of visual perception in aviation is key to improving pilot performance and reducing aviation mishaps This book is the first dedicated to the role of visual perception in aviation and it provides a comprehensive single source document encompassing all aspects of aviation visual perception Thus this book includes the foundations of visual and vestibular sensation and perception how visual perceptual abilities are assessed in pilots the pilot s perspective of visual flying a summary of human factors research on the visual guidance of flying examples of specific visual and vestibular illusions and misperceptions mishap analyses from military commercial and general aviation and finally how this knowledge is being used to better understand visual perception in aviation s next generation Aviation Visual Perception Research Misperception and Mishaps is intended to be used for instruction in academia as a resource for human factors researchers design engineers and for instruction and training in the pilot community

Local Applications of the Ecological Approach To Human-Machine Systems Peter A.

Hancock,John M. Flach,Jeff Caird,Kim J. Vicente,2018-05-02 There is a growing consensus in the human factors ergonomics community that human factors research has had little impact on significant applied problems Some have suggested that the problem lies in the fact that much HF E research has been based on the wrong type of psychology an information processing view of psychology that is reductionistic and context free Ecological psychology offers a viable alternative presenting a richer view of human behavior that is holistic and contextualized The papers presented in these two volumes show the conceptual impact that ecological psychology can have on HF E as well as presenting a number of specific examples illustrating the ecological approach to human machine systems It is the first collection of papers that explicitly draws a connection between these two fields While work in this area is only just beginning the evidence available suggests that taking an ecological approach to human factors ergonomics helps bridge the existing gap between basic research and applied problems

Gaze and Visual Perception in Sport Gal Ziv,Ronnie Lidor,2025-01-31 *Gaze and Visual Perception in Sport* is the first book that explores various aspects of gaze and visual perception in sport The way athletes control their gaze and their ability to extract relevant information from the environment is important for their ability to perform sport related motor tasks Whether it is closed self paced targeting tasks such as the basketball free throw shot or a more dynamic task such as overtaking a race car on track the visual system will play a large role in the athletes ability to achieve a high level of proficiency As eye tracking systems become available at reasonable prices the effect of gaze control and visual perception on sport related motor performance becomes more relevant in both research and professional contexts Focused on evidenced based theoretical and practical applications of gaze strategies related to expert performance in sport this cutting edge edited book brings together the multi faceted implementation of gaze behavior and visual attention in sport from both the empirical and applied perspectives This state of the art summary of the evidence based as well knowledge through to applied practice will be key
