Initiation and Control of Gait from First Principles: A Mathematically Animated Model of the Foot Craig Nevin, 2010-05-21 This thesis examines the anatomical locations of the dynamic pressures that create the first five footprints when a standing person starts to walk. It is hypothesized that the primary activity starts with the dorsiflexion or lifting of the great toe. Consequently the metatarsophalangeal region of the forefoot was studied from three directions. Viewed side on the great toe free body is found from a detailed post hoc analysis of previous kinematic data obtained from cadavers to operate as a cam. The cam model also follows closely from Aristotle's ancient description of the hinged instrument of animate motion. Viewed in coronal cross section the first metatarsal torsion strength was estimated in 13 humans, 1 gorilla, 3 chimpanzees, 1 orangutan and 1 baboon set of dry bone specimens of the hands and feet. The first metatarsal bone alone contributes 43% of the total strength of all the metatarsal bones. A result unique amongst the hominids and apes studied. Viewed in horizontal plan the dynamic components and principle axes of the footprints of 54 barefoot humans, 32 male, 22 female, age 32-11 years were studied whilst standing on a 0.5m pressure plate and then immediately when walking over a 2m plate. 4 sensors per cm² sampled at 100hz. Two footprints were obtained during the initial stance posture and the first three footprints of the initial walk. Three new principles of animate motion were deduced from the divergent results obtained from complete and dissected cadavers. The metatarsal cam from the sagittal side view, the ground reaction torque from the frontal coronal view and the amputation artifact. The philosophy of experimenting on inanimate cadavers rather than living subjects was intensively researched. Instead of assuming that gait is a uniform or regular motion as is usual, the foot was analyzed rather as if it was a beam attached to the ground. Engineering equations were used to determine the flexural properties of the foot every 0.01 seconds, including the principle axes, radius of gyration and the local shear stresses on the sensors spaced 5-7mm apart. A sequence of these impressions creates a mathematically animated model of the footprint. The local force under the foot was normalized against both the total force and contact duration. The forces under the foot were each divided between 10 anatomical regions using individual masks for each foot strike. Producing a 54 subject database from which the normal behavior of the foot could be quantified. The group showed a surprisingly low right foot step off dominance of only 54%. The combination of the radius of gyration and impulse in particular produces a succinct but powerful summary of the footprint during dynamic activity. The initial angle and magnitudes of the loads that are applied and removed demonstrates that the body first rocks onto the heels after the instruction to walk is given. The feet simultaneously invert and their arches rise off the ground as anticipated. The principle axes were then animated in a mathematical four dimensional model. The horizontal

radius of gyration is on average 5 cm during heel strike but increases to 20 cm as the forefoot comes into contact with the ground finally rising to 25 cm at toe off Significantly the applied load during the fore foot loading phase is more widely distributed than the load being removed A new and unanticipated result that is believed to be a special characteristic of the animate foot The standard deviation of the force under the great toe is the first mechanical parameter to converge in the 54 subjects conclusively verifying the hypothesis that the great toe both initiates and controls gait *First Principles* Herbert Spencer,1864 **First Principles of Algebra** Edward Olney,1881 **The First Principle - Expanded Edition Lecture** Neville Goddard,2024-02-11 THE FIRST PRINCIPLE EXPANDED EDITION LECTURE BASED ON THE LECTURE BY NEVILLE GODDARD WRITTEN BY NEVILLE GODDARD ABOUT THIS BOOK This book is a public domain ebook enriched with new content that delves into the life and teachings of the original author The additional material serves as an insightful expansion designed to provide readers with a deeper understanding of the context surrounding the author s work By incorporating details about the author s life and the philosophical underpinnings of their teachings this enhanced edition offers a comprehensive exploration that goes beyond the original text Readers are invited to engage with a more comprehensive narrative gaining not only knowledge of the author s literary contributions but also a nuanced perspective on the factors that influenced their work ABOUT NEVILLE GODDARD Neville Goddard was a mystic and spiritual teacher who lived from 1905 to 1972 He was born in Barbados and later moved to New York City where he began to study spiritual and mystical teachings He also studied the work of psychologists such as Sigmund Freud and Carl Jung Goddard s main teachings focus on the power of the imagination to create one s reality He believed that everything in our lives from our circumstances to our health is a result of our imaginal acts He taught that by changing our thoughts and beliefs we can change our lives and manifest our desires BOOK CONTENT About This Book Brief Book Introduction Brief Biography Of Neville Goddard Introduction Early Life And Awakening Teachings And Philosophy Notable Works And Legacy About Neville Goddard LECTURE THE FIRST PRINCIPLE EXPANDED CONTENT 10 LESSONS FROM THE LECTURE KEY THEMES IN NEVILLE GODDARD S TEACHINGS The Power Of Imagination Consciousness And Awareness Living From The End Revision And Reimagining Faith And Belief Inner Conversations And Self Talk The Law Of Assumption Gratitude And Appreciation Oneness And Interconnectedness Personal Responsibility And Empowerment *John Stuart Mill and the Art of Life* Ben Eggleston,Dale E. Miller,David Weinstein,2010-11-10 The Art of Life is John Stuart Mill s name for his account of practical reason In this volume eleven leading scholars elucidate this fundamental but widely neglected element of Mill s thought Mill divides the Art of Life into three departments Morality Prudence or Policy and Aesthetics In the volume s first section Rex Martin David Weinstein Ben Eggleston and Dale E Miller investigate the relation between the departments of morality and prudence Their papers ask whether Mill is a rule utilitarian and if so whether his practical philosophy must be incoherent The second section contains papers by Jonathan Riley and Wendy Donner who explore the relation between the departments

of morality and aesthetics They discuss issues ranging from supererogation to aesthetic pleasure and humanity's relationship with nature The papers in the third section consider the Art of Life's axiological first principle the principle of utility Elijah Millgram contends that Mill's own life refutes his claim that the Art of Life has a single axiological first principle Philip Kitcher maintains that Mill has a dynamic axiology requiring us to continually refine our conception of the good In the final section three papers address what it means to put the Art of Life into practice Robert Haraldsson locates an Art of Ethics in *On Liberty* that is in tension with the Art of Life Nadia Urbinati plumbs the classical roots of Mill's view of the good life Finally Colin Heydt develops Mill's suggestion that we regard our own lives as works of art

Mill's Progressive Principles David O. Brink, 2013-04-18 In *Mill's Progressive Principles* David Brink provides a systematic reconstruction and assessment of John Stuart Mill's contributions to the utilitarian and liberal traditions examining his first principles and their application to issues of representative democracy and sexual equality Brink defends novel interpretations of key elements in Mill's moral and political philosophy including his concepts of motivation happiness duty proof harm and the harm principle freedom of expression anti paternalism representative democracy and weighted voting and sexual equality However the most distinctive aspect of this account of Mill's commitments is the case it makes for a perfectionist reading of his conception of happiness and the significance this has for other aspects of his moral and political philosophy On this perfectionist conception the chief ingredients of happiness involve the exercise of a person's capacities for practical deliberation and decision that mark us as progressive beings Once this perfectionist theme is made explicit it can be shown to be central to Mill's views about utilitarianism liberalism rights democratic government and sexual equality

The Paradigm of Justice Kantilal Das, 2021-08-18 This book deals with the fascinating debate over the concept of justice proposed by two contemporary thinkers namely John Rawls and Amartya Sen Justice means what is just but how do we know what is just What would be the viable criterion to legitimize justice Is justice objective or subjective Is justice a matter of ontological issue or an issue of realization What would be the paradigm of justice These are some important issues discussed in the book Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka *John Stuart*

Proclus 412-485 A.D. was one of the last official successors of Plato at the head of the Academy in Athens at the end of Antiquity before the school was finally closed down in 529. As a prolific author of systematic works on a wide range of topics and one of the most influential commentators on Plato of all times, the legacy of Proclus in the cultural history of the West can hardly be overestimated. This book introduces the reader to Proclus' life and works, his place in the Platonic tradition of Antiquity, and the influence his work exerted in later ages. Various chapters are devoted to Proclus' metaphysical system, including his doctrines about the first principle of all reality, the One, and about the Forms and the soul. The broad range of Proclus' thought is further illustrated by highlighting his contribution to philosophy of nature, scientific theory, theory of knowledge, and philosophy of language. Finally, also his most original doctrines on evil and providence, his Neoplatonic virtue ethics, his complex views on theology and religious practice, and his metaphysical aesthetics receive separate treatments. This book is the first to bring together the leading scholars in the field and to present a state of the art of Proclean studies today. In doing so, it provides the most comprehensive introduction to Proclus' thought currently available.

Exemplars of Truth Keith Lehrer, 2019-01-08. This monograph is both an intellectual summation as well as a philosophical advancement of key themes of the work of Keith Lehrer on several key topics including knowledge, self-trust, autonomy, and consciousness. He here attempts to integrate these themes and develop an intellectual system that can constructively solve philosophical problems. The system is indebted to the modern work of Sellars, Quine, and Chisholm, as well as historically to Hume and Reid. At the core of this system lies Lehrer's theory of knowledge, which he previously called a coherence theory of knowledge but now calls a defensibility theory. Lehrer argues that knowledge requires the capacity to justify or defend the target claim of knowledge in terms of a background system. Defensibility is an internal capacity supplied by that system to meet objections to the claim. This theory, however, leaves open the problem of experience noted by other philosophers, i.e., how to explain the special role of experience in a background system. Even granted we are fallible in describing it, Lehrer offers a solution to the problem of experience, arguing that reflection on experience converts the experience itself into an exemplar, something like a sample that becomes a vehicle or term of representation. The exemplar represents itself and extends to represent the external world. It exhibits something about evidence and truth concerning experience that, as Wittgenstein noted, cannot be fully described but can only be shown. Exemplar representation is the missing link of a background system to truth about the world.

The Genesis of Neo-Kantianism, 1796-1880 Frederick C. Beiser, 2014. Neo-Kantianism was an important movement in German philosophy of the late 19th century. Frederick Beiser traces its development back to the late 18th century and explains its rise as a response to three major developments in German culture: the collapse of speculative idealism, the materialism controversy, and the identity crisis of philosophy.
