1 (b)	**Assess the severity of the risks of living in a multi-hazardous environment** **AO1 (3 marks)/AO2 (9 marks)** AO1 • Case study example of a multi-hazardous environment e.g. The Philippines • Nature, forms and potential impacts of natural hazards • Physical features of the area e.g. plate boundary type and the resultant nature of the hazards • Severity can be reduced through monitoring, education, community preparedness and adaptation AO2 • Socioeconomic development of the area can lower preparedness and therefore increase the overall risk • Some hazards are harder to prevent and prepare for than others, despite California's wealth, living near the San Andreas Fault will likely always pose a risk because the area is prone to significant seismic activity • Human factors such as population density (can be linked to development levels) increase the risk • Understanding of how hazards can link together to amplify the effects of each other e.g. heavy rainfall from storms can trigger landslides • Climate change is increasing the risk of some hazards and is altering the severity and uncertainty Ensure that students talk about a place with more than one hazard	(12)

Computer Vision -- ECCV 2014 David Fleet,Tomas Pajdla,Bernt Schiele,Tinne Tuytelaars,2014-08-14 The seven volume set comprising LNCS volumes 8689 8695 constitutes the refereed proceedings of the 13th European Conference on Computer Vision ECCV 2014 held in Zurich Switzerland in September 2014 The 363 revised papers presented were carefully reviewed and selected from 1444 submissions The papers are organized in topical sections on tracking and activity recognition recognition learning and inference structure from motion and feature matching computational photography and low level vision vision segmentation and saliency context and 3D scenes motion and 3D scene analysis and poster sessions

Thermal Process Modeling 2014: B. Lynn Ferguson, Robert Goldstein, Scott MacKenzie, and Rozalia Papp,2014-06-01 Thermal processes are key manufacturing steps in producing durable and useful products with solidification welding heat treating and surface engineering being primary steps These papers represent the latest state of the art in thermal process modeling The breadth of topics covers the depth of the industry *ACCA Options P4 Advanced Financial Management Revision Kit 2014* BPP Learning Media,2014-06-01 The examining team reviewed P4 Practice Revision Kit provides invaluable guidance on how to approach the exam Questions are grouped by key topic areas and integrated where appropriate Three mock examinations provide ample opportunity to practise questions and marking schemes show you how the examiner awards marks *Crop Systems Biology* Xinyou Yin,Paul C. Struik,2015-11-11 The sequencing of genomes has been completed for an increasing number of crop species and researchers have now succeeded in isolating and characterising many important QTLs genes High expectations from genomics however are waving back toward the recognition that crop physiology is also important for realistic improvement of crop productivity Complex processes and networks along various hierarchical levels of crop growth and development can be thoroughly understood with the help of their mathematical description modelling The further practical application of these understandings also requires quantitative predictions In order to better support design engineering and breeding for new crops and cultivars for improving agricultural production under global warming and climate change there is an increasing call for an interdisciplinary research approach which combines modern genetics and genomics traditional physiology and biochemistry and advanced bioinformatics and modelling Such an interdisciplinary approach has been practised in various research groups for many years However it does not seem to be fully covered in the format of book publications We want to initiate a book project on crop systems biology narrowing the gaps between genotypes and phenotypes and the gaps between crop modelling and genetics genomics for publication in 2013 2014 The book will be meant for those scientists and graduate students from fundamental plant biology and applied crop science who are interested in bridging the gap between these two fields We have invited a group of scientists who have very good track records in publishing excellent papers in this field or in a closely related area to contribute chapters to this new book and they have agreed to do so **Social Computing, Behavioral-Cultural Modeling**
