The Divine Programmer:

The Divine Programmer Ed Rychkun, 2014-12-13 Authors and Healers Aly McDonald and Ed Rychkun will take you into the fringe of metascience and science to reveal what works in creating healing and reality miracles. The authors bring forward some of the top Healers to example the detailed processes used to define the common denominators when healing miracles do work inside the body. In an attempt to quantify these processes, the authors draw upon a binary trinary computer analogy to define the Divine Programmer's steps to maximize success. In a revealing journey, you will look into the emerging world of how subtle energy fields such as morphic, zero-point, light body, heart, chakra, auras, and torroids work with quantum energies accessible through the heart-brain rather than the traditional ego-brain. Learn how beliefs stuck in the subconscious as well as curtailing the 3rd stage of human awareness can sabotage efforts and how to change this. In further delving into creating reality miracles outside the body, the authors take you on a journey to analyze the Law of Attraction to see how and why it does work, some of the time, also examining what prevents it from working. After summarizing the Programmer's Code from top Guru's techniques in a new light of trinary versus binary computing, the authors introduce how 50 trillion cells work like computer chips in the ultimate Divine Human trinary computer. Here they develop the processes of how as a Divine Programmer using the operating system of Divine Intelligence, the Compiler of the Heart, and the Program Language of Love, one can potentially command the brain to change the holographic reality to attract and create internal and external miracles.

The Divine Programmer II Ed Rychkun, 2015-12-04 In this sequel to *The Divine Programmer: Creating Miracles*, the authors will take you out of the norm of the prevailing consciousness and answer radical questions like: Is our reality a holographic illusion? Are we living in a grand immersion movie? Did we create and contract for our Life Plan? Why do miracles work some of the time? How do placebos create dramatic healing miracles? What is the process most common in miracle healing? How can we proactively control our reality? What is the physiological process of mind over matter? Who or what is Divine Intervention? How do we unlock the full potential of DNA? Learn how the brain as directed by the subconscious mind is the CEO of our physical reality and how it evolves through stages of evolution to the age of 28. Learn how neurological processes open or limit the ability to proactively create new reality or default to old prevailing boxes of consciousness. In this book, you will understand the statement as above so below and how it works in the process of downward causation when You are your Heart-Mind. This book will demystify the subtle energy bodies. It will present how the mind can select and energize visions from the quantum field of infinite possibilities, then direct the subconscious and the brain to change neurological wiring to prepare for a new holographic reality. Understand clearly the key clinically proven steps in reviewing life plans past, present, and future to attract and create internal health and external wealth miracles. Know the intricate relationship between the laws of Karma, Cause, Effect, and Attraction.

Finding True Happiness Robert Spitzer, 2015-03-30 One of the hottest topics in contemporary culture is happiness so much so that the United Nations declared an International Happiness Day in response to the immense popularity of Pharrell Williams song Happy The explanation for this current fixation seems to lie in the contrary phenomenon unhappiness Despite the fact that we have tremendous access to every imaginable form of entertainment we experience a pervading sense of insecurity emptiness and malaise amid sporadic peak experiences The problem seems to lie less in the external environment than in the internal one We seem in the words of Viktor Frankl to be suffering from an absence of meaning that pervades both individuals and societies giving rise to a collective emptiness loneliness and alienation Finding True Happiness attempts to provide a way out of this personal and cultural vacuum by helping people to identify and then reach for happiness As Aristotle noted 2 400 years ago happiness is the one thing we can choose for its own sake everything else is chosen for the sake of happiness After an exhaustive investigation of philosophical psychological and theological systems of happiness author Fr Spitzer developed the Four Levels of Happiness which he based on the classical thinkers Plato Aristotle Augustine and Aquinas the contemporary philosophers Marcel Scheler Buber Ricoeur and Jaspers and the modern psychologists Maslow Frankl Erikson Seligman Kohlberg and Gilligan Finding True Happiness is both a philosophical itinerary and a practical guidebook for life s most important journey from the mundane and the meaningless to transcendent fulfillment No other book currently available combines such breadth of practical advice and such depth of philosophical psychological and spiritual wisdom

Chaos and Life Richard J. Bird, 2003-11-26 Why in a scientific age do people routinely turn to astrologers mediums cultists and every kind of irrational practitioner rather than to science to meet their spiritual needs The answer according to Richard J Bird is that science especially biology has embraced

a view of life that renders meaningless the coincidences serendipities and other seemingly significant occurrences that fill people's everyday existence Evolutionary biology rests on the assumption that although events are fundamentally random some are selected because they are better adapted than others to the surrounding world This book proposes an alternative view of evolving complexity Bird argues that randomness means not disorder but infinite order Complexity arises not from many random events of natural selection although these are not unimportant but from the playing out of chaotic systems which are best described mathematically When we properly understand the complex interplay of chaos and life Bird contends we will see that many events that appear random are actually the outcome of order
