At the core of *Social Media Freaks* is the question: Does social media reproduce inequalities or is it a tool for subverting them? *Social Media Freaks* presents a virtual ethnography of social media focusing on issues of identity and inequality along five dimensions: race, class, gender, sexuality, and disability. It presents original and secondary findings while also utilizing social theory to explain the dynamics of social media. It teaches readers how to engage social media as a tool for social activism while also examining the limits of social media's value in the quest for social change.
