The End of Poverty Jeffrey Sachs, 2011-11-24 Jeffrey Sachs draws on his remarkable 25 years experience to offer a thrilling and inspiring vision of the keys to economic success in the world today. Marrying vivid storytelling with acute analysis, he sets the stage by drawing a conceptual map of the world economy and explains why over the past 200 years wealth and poverty have diverged and evolved across the planet and why the poorest nations have been so markedly unable to escape the trap of poverty. Sachs tells the remarkable stories of his own work in Bolivia, Poland, Russia, India, China, and Africa to bring readers with him to an understanding of the different problems countries face. In the end, readers will be left not with an understanding of how daunting the world's problems are, but how solvable they are and why making the effort is both our moral duty and in our own interests.

Development in Africa's Informal Settlements: Below the Proletariat Angela R. Pashayan, 2023-12-19 This book discusses the effectiveness of international development programs in African informal settlements, slums. It also represents the voices of slum dwellers and how they view the programs offered. With over 60% of Africans living in slums, the book intends to foster dialogue among development professionals to determine how to improve service to their clients, people experiencing extreme poverty. This book examines the critical thinking disconnect between development professionals and slum dwellers. It enables practitioners, professors, and their students to investigate the gap between the types of development programs offered versus what is most beneficial to reduce extreme poverty in slum communities. With a sample of 500 residents from Mukuru Slum in Nairobi, Kenya, and 100 development professionals with expertise in poverty reduction in slums, this book sheds light on the similarities and differences between various programs. Most importantly, this book provides a theoretical way forward: The Theory of Extreme Poverty Reduction.

based on Freirean pedagogy to stimulate discussion on how to program new strategies for authentic dialogue with slum dwellers that leads to the critical consciousness necessary for successful poverty reduction Politics of Anxiety Emmy Eklundh, Andreja Zevnik, Emmanuel-Pierre Guittet, 2017-04-26 From the threats posed by austerity and the fears around global migration to the unsettled notion of resistance our political world is permeated with anxieties But what does this mean for our everyday lived political experience Do governments provoke or encourage a sense of anxiety as a form of control and power How do citizens react to comply with or resist this sense of anxiety This book interrogates the different faces of anxiety and provides a systematic engagement with its different manifestations It uses different disciplinary approaches and methodologies to study political and social phenomena in order to paint a picture of the impact of anxiety and how it governs and mobilises individuals The key strength of these contributions comes from their theoretically informed analysis of empirical problems Moving beyond the concept of the risk society and the recurrence of cyclical capitalist crises this book challenges the notion of the status quo to consider urges and desires for political change By highlighting that anxiety is different from fear the book examines new implications for the study of political events The Reproach of Hunger David Rieff, 2015-10-06 In 2000 the world's leaders and experts agreed that the eradication of hunger was the essential task for the new millennium Yet in the last decade the price of wheat soya and rice have spiraled seen by many as the cause of widening poverty gap and political unrest from the Arab Spring to Latin America This food crisis has condemned the bottom billion of the world's population who live on less than 1 a day to a state of constant hunger In *The Reproach of Hunger* leading expert on humanitarian aid and development David Rieff goes in search of the causes of this food security crisis as well as the failures to respond to the disaster In addition to the failures to address climate change poor governance and misguided optimism Rieff cautions against the increased privatization of aid with such organization as the Gates Foundation spending more than the WHO on food relief The invention of the celebrity campaigner from Bono to Jeffrey Sachs whose business led solutions have robbed development of its political urgency The hope that the crisis of food scarcity of food production can be solved by a technological innovation In response Rieff demands that we rethink the fundamental causes of the world's grotesque inequalities and see the issue as a political challenge we are all failing to confront Enlightened Aid Amanda Kay McVety, 2015 *Enlightened Aid* examines the intellectual and political origins of Point Four the first American aid program for the developing world and the economic and diplomatic implications of its operations in Ethiopia Indigenous Discourses on Knowledge and Development in Africa Edward Shizha, Ali A. Abdi, 2013-12-04 African social development is often explained from outsider perspectives that are mainly European and Euro American leaving African indigenous discourses and ways of knowing and doing absent from discussions and debates on knowledge and development This book is intended to present Africanist indigenous voices in current debates on economic educational political and social development in Africa The authors and contributors to the volume present bold and timely ideas and scholarship for defining Africa

through its challenges possible policy formations planning and implementation at the local regional and national levels The book also reveals insightful examinations of the hype the myths and the realities of many topics of concern with respect to dominant development discourses and challenges the misconceptions and misrepresentations of indigenous perspectives on knowledge productions and overall social well being or lack thereof The volume brings together researchers who are concerned with comparative education international development and African development research and practice in particular Policy makers institutional planners education specialists governmental and non governmental managers and the wider public should all benefit from the contents and analyses of this book **Theories of Development, Second Edition**

same time they chart the rise of an alter globalization movement of those adversely affected by market fundamentalism
 Today this movement is putting alternatives into action across the globe and what constitutes development is being redefined
 As the authors present this dramatic confrontation of paradigms they bring into question the entire conventional notion of
