

The Five Elements of Effective Thinking

by Michael Starbird & Edward B. Burger

Understand Deeply

Don't face complex issues head-on; first understand simple ideas deeply. Clear the clutter and expose what's really important. Be brutally honest about what you know and don't know.

Then see what's missing, identify the gaps, and fill them in. Let go of bias, prejudice, and preconceived notions. Rock-solid understanding is the foundation for success.

Make Mistakes

Fail to succeed. Intentionally get it wrong to inevitably get it even more right. Mistakes are great teachers — they highlight unforeseen opportunities and holes in your understanding. They also show you which way to turn next, and they ignite your imagination.

Raise Questions

Constantly create questions to clarify and extend your understanding. What's the real question? Working on the wrong questions can waste a lifetime.

Ideas are in the air — the right questions will bring them out and help you see connections that otherwise would have been invisible.

Follow the Flow of Ideas

Look back to see where ideas came from and then look ahead to discover where those ideas may lead. A new idea is a beginning, not an end. Ideas are rare — milk them. Following the consequences of small ideas can result in big payoffs.

Change

By mastering the first four elements, you can change the way you think and learn. You can always improve, grow, and extract more out of your education, yourself, and the way you live your life. Change is the universal constant that allows you to get the most out of living and learning.
