Environmental Hazards in the Arabian Gulf Region Abd el-aziz Khairy Abd el-aal,Abdullah Al-Enezi,Qusaie E. Karam,2024-12-03 This book discusses the environmental hazards in the Gulf countries GCC The publication of this book is of great importance to all those interested and knowledgeable in the field Climate change leads to the occurrence of major environmental hazards that must be reduced by estimating the extent of climate change and developing appropriate solutions to mitigate those effects Climate changes are produced indirectly as a result of human activities with uncalculated consequences The process of climate change is always accompanied by catastrophic environmental problems such as global

warming high temperatures storms hurricanes floods desertification processes air pollution and the extinction of many types and forms of animals and plants The Gulf countries are located in the eastern part of the Arabian Peninsula where the crude oil is extracted in several fields The states suffer from many environmental problems as a result of its geographical location global climate change and also from oil extraction operations The problems include high temperatures induced earthquakes and pollution in the soil and marine coast as well as desertification processes sand dunes movement and other environmental problems Earthquakes are also recorded from and near the oil fields indicating the link between the oil extraction process and the occurrence of earthquakes Indeed the environmental studies published in the Gulf state are very few and do not meet the need of the scientific community in region which need more important environmental publications that help in the great and rapid urban developments in the area
