Action should be dismounted as described above after every 1000 shots and cleaned with gasoline, kerosene or a cleaning liquid that will remove all bullet grease and powder residue. Then oil lightly with thin lubricating oil.

TO CLEAN BARREL

Clean from rear when action is removed - First wipe out residue with clean patch of cloth on cleaning rod. With a clean patch of cloth on cleaning rod that is well moistened with a Solvent that will remove lead deposit, saturate bore thoroughly and let stand at least two hours. Randy O. Frost, Gail Steketee, 2014 Hoarding involves the acquisition of and inability to discard large numbers of possessions that clutter the living area of the person collecting them. It becomes a disorder when the behavior causes significant distress or interferes with functioning. Hoarding can interfere with activities of daily living such as being able to sit in chairs or sleep in a bed, work efficiency, family relationships as well as health and safety. Hoarding behavior can range from mild to life threatening. Epidemiological findings suggest that hoarding occurs in 2.6% of the adult population, making it two to three times more common than obsessive compulsive disorder. The fifth edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM-5) now includes Hoarding Disorder as a distinct disorder within the OCD and Related Anxiety Disorders section, creating a demand for information about it. The Oxford Handbook of Hoarding and Acquiring is the first volume to detail the empirical research on hoarding. Including contributions from all of the leading researchers in the field, this comprehensive volume is divided into four sections in addition to introductory and concluding chapters by the editors: Phenomenology, Epidemiology and Diagnosis, Etiology, Assessment and Intervention, and Hoarding in Special Populations. The summaries of research and clinical interventions contained here clarify the emotional and behavioral features, diagnostic challenges, and nature of the treatment interventions for this new disorder. This handbook will be a critical resource for both practitioners and researchers, including psychiatrists, psychologists, neurologists, epidemiologists, social workers, occupational therapists, and other health and mental health professionals who encounter clients with hoarding problems in their practice and research.
