Fritz,Shing F. Fung,2006-02-23 This collection of papers will address the question What is the Magnetospheric Cusp and what is its role in the coupling of the solar wind to the magnetosphere as well as its role in the processes of particle transport and energization within the magnetosphere The cusps have traditionally been described as narrow funnel shaped regions that provide a focus of the Chapman Ferraro currents that flow on the magnetopause a boundary between the cavity dominated by the geomagnetic field i e the magnetosphere and the external region of the interplanetary medium

Measurements from a number of recent satellite programs have shown that the cusp is not confined to a narrow region near local noon but appears to encompass a large portion of the dayside high latitude magnetosphere and it appears that the cusp is a major source region for the production of energetic charged particles for the magnetosphere Audience This book will be of interest to space science research organizations in governments and industries the community of Space Physics scientists and university departments of physics astronomy space physics and geophysics **Polo 2: a User's Guide to Multiple**

Schlaile,2020-12-21 This book explores the question of whether and how meme theory or memetics can be fruitfully utilized in evolutionary economics and proposes an approach known as economemetics which is a combination of meme theory and complexity theory that has the potential to combat the fragmentation of evolutionary economics while re connecting the field with cultural evolutionary theory By studying the

intersection of cultural and economic evolution complexity economics computational economics and network science the authors establish a connection between memetics and evolutionary economics at different levels of investigation The book first demonstrates how a memetic approach to economic evolution can help to reveal links and build bridges between different but complementary concepts in evolutionary economics Secondly it shows how organizational memetics can help to capture the complexity of organizational culture using meme mapping Thirdly it presents an agent based simulation model of knowledge diffusion and assimilation in innovation networks from a memetic perspective The authors then use agent based modeling and social network analysis to evaluate the diffusion pattern of the Ice Bucket Challenge as an example of a viral meme Lastly the book discusses the central issues of agency creativity and normativity in the context of economemetics and suggests promising avenues for further research
