SBI Clerk Previous Year Paper 2023

**Directions (1-4):** Read the following passage and answer the given questions.

Brown's theory of positive thinking, while optimistic in its emphasis, fails to address the **deeper** complexities and inherent uncertainties of life. Advocating for a **constant** positive outlook, the theory overlooks the intricate interplay of external factors and human emotions that shape our existence.

Central to this theory is the belief that positivity can significantly **mitigate** life's challenges. However, the perspective underestimates the weight of uncontrollable elements such as socio-economic backgrounds, health issues, and random life events. These factors often have a profound impact on our lives, regardless of our mindset. By downplaying these aspects, Brown's theory risks oversimplifying the diverse and often unpredictable nature of human experiences.

Furthermore, the theory's emphasis on perpetual positivity neglects the importance of experiencing a range of emotions. Emotions like sadness, anger, and frustration are not only natural but necessary for a holistic emotional experience. The insistence on positivity can lead to the suppression of these emotions, causing psychological strain and potentially exacerbating mental health issues. This is contrary to the theory's goal of fostering well-being.

Additionally, Brown's theory does not fully recognize the concept of resilience, which is crucial in navigating life's challenges. Resilience is gained through overcoming difficulties, not just maintaining a positive attitude. It involves understanding the realities of one's situation, accepting the presence of obstacles, and developing strategies to adapt and overcome them. This approach is far more practical and sustainable than mere positive thinking.

In conclusion, while encouraging a positive outlook is beneficial, it is insufficient when confronted with life's complexities. A more nuanced approach, which acknowledges the full spectrum of human emotions and life's unpredictability, is essential. Frustrated thinking, without the accompaniment of resilience and an acceptance of life's uncertainties, can lead to disillusionment. Integrating positivity with a realistic and adaptable mindset is, therefore, a more effective strategy for dealing with life's inherent uncertainties.

**Q1. According to the passage, what is a fundamental flaw in Brown's theory of positive thinking?**

(a) The theory oversimplifies the nature of human existence.

(b) Brown's theory excessively emphasizes the importance of external well-being.

(c) The theory significantly underestimates unpredictability and complexity of life.

(d) It advocates for a perspective that readily supports a pessimistic development.

(e) The focus of Brown's theory is primarily on active health issues.

**Q2. What does the passage imply is a more viable approach than mere positive thinking?**

(a) Formulating and implementing strategies to adapt to economic life's challenges.

(b) Strictly concentrating on achieving a state of happiness at all circumstances.

(c) Adopting an approach that renders completely ignorable life's inherent difficulties.

(d) Constantly maintaining a positive attitude irrespective of underlying realities.

(e) Depending on the suppression of emotions to avoid uncertainties of positivity.

**Q3. How does the passage address the role of external factors in Brown's theory of positive thinking?**

(a) It criticizes the theory for its comprehensive inclusion of external factors.

(b) The passage criticizes the theory for its disregard of external variables.

(c) It asserts that external factors are overemphasized in Brown's theory.

(d) According to the passage, external factors are outside the control of the theory.

(e) The theory is praised for perfectly balancing internal and external influences.
