powers aren't fully developed and she's heard a male voice in her head for as long as she can remember. On the day of her Criterion the test that all citizens of the Realms of Amera have to take to prove their worth something goes terribly wrong resulting in carnage and causing her to run away in fear and self-blame. She stumbles into a buried facility that's controlled by a friendly if sometimes snarky artificial intelligence and finds out important information that she knows that she must share with her family back home. She soon learns that many things that she thought she knew are actually lies. Then old enemies return to the colonies and peace talks descend into chaos. This first volume in the Evolutionaries series skillfully balances intriguing worldbuilding whose details are slowly revealed with well-paced action sequences. It also ably handles Violet's character development along the way while also offering a diverse lovable supporting cast whose members become the protagonist's close friends and allies. The novel effectively addresses themes of cooperation and isolationism as well as autonomy, consent, and moving on with one's life after learning of long-held secrets. Cont'd A notable and thoughtful addition to the crowded shelf of post-apocalyptic YA novels.
