US Tier 4i, EU Stage IIIb

The industrial engines from Scania are based on a robust design with a strength-optimized cylinder block containing wet-cylinder liners that can easily be exchanged. Individual cylinder heads with 4 valves per cylinder promotes reparability and fuel economy.

The engine is equipped with a Scania developed Engine Management System, EMS, in order to ensure the control of all aspects related to engine performance. The injection system is Scania's RPI (Extra High Pressure Injection), a common rail system that in combination with SCR (Selective-Catalytic Reduction) gives low exhaust emissions with good fuel economy and a high torque. The engine can be fitted with many accessories such as air cleaners, silencers, PTOs and flywheels in order to suit a variety of installations.
