Projecting Spirits Pasi Väliäho,2022-06-28 The history of projected images at the turn of the seventeenth century reveals a changing perception of chance and order contingency and form In *Projecting Spirits* Pasi Väliäho maps how the leading optical media of the period the camera obscura and the magic lantern developed in response to and framed the era's key intellectual dilemma of whether the world fell under God's providential care or was subject to chance and open to speculating As Väliäho shows camera obscuras and magic lanterns were variously employed to give the world an intelligible and manageable design Jesuit scholars embraced devices of projection as part of their pursuit of divine government whilst the Royal Society fellows enlisted them in their quest for empirical knowledge as well as colonial expansion Projections of light and shadow grew into critical metaphors in early responses to the turbulences of finance In such instances Väliäho argues projection became an indispensable cognitive form to both assert providence and to make sense of an economic reality that was gradually escaping from divine guidance Drawing on a range of materials philosophical scientific and

The Magic Lantern at Work Martyn Jolly, Elisa deCourcy, 2020-01-20 For centuries various new media technologies have provided individuals with a set of powerful tools to affect their audiences Among these the magic lantern show was perhaps the most pervasive and persuasive Around the world audiences gathered together in darkened rooms to see a sequence of projected images transition one into another as they listened to personal stories or scripted narrations Through the power of the magic lantern audiences for the first time became the direct witnesses to distant often traumatic political events they visually learned new scientific and medical knowledge virtually experienced distant places and collectively experienced strange often uncanny phenomena Although relatively neglected until recently the apparatus of the magic lantern is now receiving the attention it deserves from historians curators and artists Through a set of case studies focusing on the use of the magic lantern by very different but equally fascinating individuals a team of international scholars analyses the emerging power of the lantern show in the nineteenth and twentieth centuries within politics religion travel science health marketing

social actual muestra un deseo impulsivo persistente y angustioso de encontrar conocimientos prácticos que propicien un buen vivir en una sociedad justa y equitativa. Es un empeño que persigue a la emergencia de las ciencias sociales en el siglo XIX se agudiza en los movimientos investigadores de posguerra y hoy está representado por las evaluaciones internacionales de los sistemas educativos y la formación profesional que marcan a los gobiernos el camino para modernizar la educación y facilitar una vida buena a las personas. Así lo expresa la relación entre la política y la investigación estadounidenses donde las reformas se verifican con pruebas empíricas científicas sobre lo que funciona. El libro analiza la idea de conocimiento práctico y útil que históricamente ha ido cambiando con el tiempo y su relevancia en la investigación actual dedicada a la reforma educativa, la mejora de la instrucción y la profesionalización. El estudio de la ciencia parte de diversas teorías sociales y culturales y de estudios históricos para comprender la política científica y el conocimiento científico al servicio del cambio social y educativo. Se espera de la investigación que pueda fomentar las condiciones sociales que propician una vida mejor y la formación de personas cuya conducta encarne las cualidades y características de esa vida mejor: el buen ciudadano, padre y madre o trabajador. Sin embargo, es una esperanza que siempre explicita las amenazas y a las poblaciones peligrosas que ponen en riesgo el futuro imaginado. Thomas Popkewitz analiza cómo la investigación destinada a corregir los males sociales paradójicamente está implicada en la inscripción de diferencias que en los esfuerzos por incluir provoca exclusión y abyección.
