Pivotal Response Training Manual:

Educating Young Children with Autism Spectrum Disorders Erin E. Barton, Beth Harn, 2014-01-07 According to the CDC one in fifty American children is diagnosed as having an autism spectrum disorder. This means more school aged children are entering classrooms with ASDs and teachers are being called upon to help facilitate their learning. *Educating Young Children with Autism Spectrum Disorders* is aimed at providing strategies for teachers, school counselors, and psychologists to help address the needs of children on the spectrum as well as their families. Erin E. Barton and Beth Harn draw on current research and practices to discuss the possible causes of autism and to help prepare educators not only for teaching children in the classroom but also for providing families with the tools necessary to continue the educational process at home. Included are topics such as Improving communication and socialization, Developing instructive lessons, Assessing students' progress, Including families in educational goals, Finding students' special interests and using those to help facilitate learning, Managing challenging behavior, And more. Including forms, charts, and a range of classroom activities, this is the only resource you will need to gain the insight and tools for making a difference in the educational lives of young children with autism.

Handbook of Psychological Treatment Protocols for Children and Adolescents Vincent B. Van Hasselt, Michel Hersen, 1998-03 Drawing together systematic empirically based guidelines for accountable clinical work with children and adolescents with varying presenting problems, this book is a compendium of state-of-the-art treatment manuals. Specific instructions and relevant case illustrations facilitate the practitioner's efforts to replicate the approaches.

Classroom Pivotal Response Teaching for Children with Autism Jessica Suerheinrich, Sarah Reed, Laura Schreibman, Cynthia Bolduc, 2011-08-01 Classroom Pivotal Response Teaching or CPRT was developed to help meet the educational needs of young children with autism. CPRT originally called Pivotal Response Training or Treatment is a form of naturalistic behavioral intervention based on the principles of applied behavior analysis (ABA) and is soundly supported in the scientific literature. This manual will describe the components of CPRT and how to implement the approach in your classroom. Although this manual is geared primarily toward preschool through grade 3 teachers, CPRT strategies can be used by a variety of professionals. Speech and language pathologists, occupational therapists, behavior specialists, psychologists, and other teaching professionals may all find CPRT a valuable strategy. Additionally, the techniques in this manual may be useful with typically developing children and those with a variety of special needs. Most children can benefit from this structured systematic approach that utilizes naturally occurring teaching opportunities. One of the strengths of this approach is that it is adaptable to a wide range of teaching goals and service settings. All who teach are encouraged to integrate CPRT into their existing strategies as often as possible.
