## Paper 1 Of Economics Grd11 2013:

Papers ,1959     Policy-Making in the GCC Neil Quilliam,Mark C. Thompson,2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

A *Monetary and Fiscal History of Latin America, 1960–2017* Timothy J. Kehoe,Juan Pablo Nicolini,2022-01-11 A major new and comprehensive look at six decades of macroeconomic policies across the region What went wrong with the economic development of Latin America over the past half century Along with periods of poor economic performance the region's countries have been plagued by a wide variety of economic crises This major new work brings together dozens of leading economists to explore the economic performance of the ten largest countries in South America and of Mexico Together they advance the fundamental hypothesis that despite different manifestations these crises all have been the result of poorly designed or poorly implemented fiscal and monetary policies Each country is treated in its own section of the book with a lead chapter presenting a comprehensive database of the country's fiscal monetary and economic data from 1960 to 2017 The chapters are drawn from one day academic conferences hosted in all but one case in the focus country with participants including noted economists and former leading policy makers Cowritten with Nobel Prize winner Thomas J Sargent the editors introduction provides a conceptual framework for analyzing fiscal and monetary policy in countries around the world particularly those less developed A final chapter draws conclusions and suggests directions for further research A vital resource for advanced undergraduate and graduate students of economics and for economic researchers and policy makers A Monetary and Fiscal History of Latin America 1960–2017 goes further than any book in stressing both the singularities and the similarities of the economic histories of Latin America's largest countries Contributors Mark Aguiar Princeton U Fernando Alvarez U of Chicago Manuel Amador U of Minnesota Joao Ayres Inter American Development Bank Saki Bigio UCLA Luigi Bocola Stanford U Francisco J Buera Washington U St Louis

Hove, Martha Matashu, 2021-11-30 This book investigates the intersections between education, social justice, gendered violence and human rights in South African schools and universities The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children and marginalised communities The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa Contributors to this volume examine the many ways in which social justice and gendered violence mirror express project and articulate the larger phenomenon of human rights violations in Africa and how in turn the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact and interpret quality education The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces This book is essential

*Burnt by Democracy* Jacqueline Kennelly,2023-11-30 Burnt by Democracy traces the political ascendance of neoliberalism and its effects on youth The book explores democracy and citizenship as described in interviews with over forty young people ages 16 to 30 who have either experienced homelessness or identify as an activist living in five liberal democracies Canada Australia New Zealand the United States and the United Kingdom Highlighting significant cuts to social and affordable housing astronomical increases in the costs of higher education and the transformation and erosion of state benefits systems Jacqueline Kennelly argues that democracy's decline is not occurring because young people are apathetic or focused on informal politics or unaware of their civic duties Rather it is because of collective misunderstanding about how democracy is actually structured how individuals learn to participate and how growing wealth inequality has undermined the capacity of those at the bottom to meaningfully advocate for changes that might improve their conditions Against a vivid and often heart breaking backdrop of stories from young people struggling to survive and thrive under conditions of ever expanding state retrenchment and inequality Burnt by Democracy makes a timely and impassioned plea for protecting and strengthening democracy by truly levelling the playing field for all
