The Development of Social Cognition Suzanne Hala, 2013-11-12 The Development of Social Cognition presents a lively up to date examination of both the classical issues and contemporary understanding of theory and research in social cognitive development The initial chapters highlight one of the central theoretical tensions in the field which is whether the development of understanding people is fundamentally different from understanding things Subsequent chapters are devoted to development across specific areas of social cognition from infancy through to adolescence The text ends with a comprehensive examination of the development of moral aspects of social cognition

Lexical Tone Perception in Infants and Young Children: Empirical studies and theoretical perspectives Leher Singh, Denis Burnham, Jessica Hay, Liquan Liu, Karen Mattock, 2019-11-20 In psycholinguistic research there has traditionally been a strong emphasis on understanding how particular language types are processed and learned In particular Romance and Germanic languages e g English French German have until recently received more attention than other types such as Chinese languages This has led to selective emphasis on the phonological building blocks of European languages consonants and vowels to the exclusion of lexical tones which like consonants and vowels determine lexical meaning but unlike consonants and vowels are based on pitch variations Lexical tone is pervasive it is used in at least half of the world languages Maddieson 2013 e g most Asian and some African Central American and European languages This Research Topic brings together a collection of recent empirical research on the processing and representation of lexical tones across the lifespan with an emphasis on advancing knowledge on how tone systems are acquired The articles focus on various aspects of tone early perception of tones influences of tone

on word learning the acquisition of new tone systems and production of tones One set of articles report on tone perception at the earliest stage of development in infants learning either tone or non tone languages Tsao and Chen et al demonstrate that infants sensitivity to Mandarin lexical tones as well as pitch improves over the first year of life in native and non native learners in contrast to traditional accounts of perceptual narrowing for consonants and vowels G tz et al report a different pattern of perception for Cantonese tones and further demonstrate influences of methodological approaches on infants tone sensitivity Fan et al demonstrate that sensitivity to less well studied properties of tone languages such as neutral tone may develop after the first year of life Cheng and Lee ask a similar question in an electrophysiological study and report effects of stimulus salience on infants neural response to native tones In a complementary set of studies focused on tone sensitivity in word learning Burnham et al demonstrate that infants bind tones to newly learned words if they are learning a tone language either monolingually or bilingually although it was also found that object word binding was influenced by the properties of individual tones Liu and Kager chart a developmental trajectory over the second year of life in which infants narrow in their interpretation of non native tones Choi et al investigate how learning a tone language can influence uptake of other suprasegmental properties of language such as stress and demonstrate that native tone sensitivity in children can facilitate stress sensitivity when learning a stress based language Finally two studies focus on sensitivity to pitch in a sub class tone languages pitch accent languages In a study on Japanese children s abilities to recognise words they know Ota et al demonstrate a limited sensitivity to native pitch contrasts in toddlers In contrast Ramachers et al demonstrate comparatively strong sensitivity to pitch in native and non native speakers of a different pitch accent system Limburghian when learning new words Several studies focus on learning new tone systems In a training study with school aged children Kasisopa et al demonstrate that tone language experience increases children s abilities to learn new tone contrasts Poltrock et al demonstrate similar advantages of tone experience in learning new tone systems in adults And in an electrophysiological study Liu et al demonstrate order effects in adults neural responses to new tones discussing implications for learning tone languages as an adult Finally Hannah et al demonstrate that extralinguistic cues such as facial expression can support adults learning of new tone systems In three studies investigating tone production Rattansone et al report the results of a study demonstrating kindergartners asynchronous mastery of tones delayed acquisition of tone sandhi forms relative to base forms In a study interrogating a corpus of adult tone production Han et al demonstrate that mothers produce tones in a distinct manner when speaking to infants tone differences are emphasised more when speaking to infants than to adults Combining perception and production of tones Wong et al report asynchronous development of tone perception and tone production in children The Research Topic also includes a series of Opinion pieces and Commentaries addressing the broader relevance of tone and pitch to the study of language acquisition Curtin and Werker discuss ways in which tone can be integrated into their model of infant language development PRIMIR Best discusses the phonological status of lexical tones and considers how

recent empirical research on tone perception bears on this question Kager focuses on how language learners distinguish lexical tones from other sources of pitch variation e.g. affective and pragmatic that also inform language comprehension Finally Antoniou and Chin unite evidence of tone sensitivity from children and adults and discuss how these areas of research can be mutually informative Psycholinguistic studies of lexical tone acquisition have burgeoned over the past 13 years This collection of empirical studies and opinion pieces provides a state of the art panoply of the psycholinguistic study of lexical tones and demonstrate its coming of age The articles in this Research Topic will help address the hitherto Eurocentric non tone language research emphasis and will contribute to an expanding narrative of speech perception speech production and language acquisition that includes all of the world's languages Importantly these studies underline the scientific promise of drawing from tone languages in psycholinguistic research the research questions raised by lexical tone are unique and distinct from those typically applied to more widely studied languages and populations The comprehensive study of language acquisition can only benefit from this expanded focus

Hearing Eye II Douglas Burnham, Ruth Campbell *G. Away*, B J Dodd, 2013-10-28 This volume outlines some of the developments in practical and theoretical research into speechreading lipreading that have taken place since the publication of the original *Hearing by Eye* It comprises 15 chapters by international researchers in psychology psycholinguistics experimental and clinical speech science and computer engineering It answers theoretical questions what are the mechanisms by which heard and seen speech combine and practical ones what makes a good speechreader Can machines be programmed to recognize seen and seen and heard speech The book is written in a non technical way and starts to articulate a behaviourally based but cross disciplinary programme of research in understanding how natural language can be delivered by different modalities

European societies to the social dynamics of the original milieu in which the texts were produced **Caper** Ephraim Philip Lansky, Helena Maaria Paavilainen, Shifra Lansky, 2013-11-19 **Caper** The Genus *Capparis* presents a pharmacognostic and ethnopharmacological exploration of the genus *Capparis* emphasizing its medicinal potential There is a long history of safe usage of *Capparis* parts both in diet and as plant drugs throughout the world and the details of this usage are summarized in 39 tables covering numerous *Capparis* species This detailed survey of historical and traditional medical uses of capers provides a forum for the integration of ethnomedicine and modern pharmacology This book tracks the use of the genus *Capparis* from the present position of caper fruit and its flowers as a niche culinary article of economic importance to ancient times and its use in traditional medicine of the Mediterranean and the Middle East Section I covers the various classes of compounds found in *Capparis* that hold potential for being physiologically and medically active including alkaloids flavonoids vitamins and proteins and amino acids Section II examines therapeutic uses for *Capparis* species for medical conditions such as inflammation rheumatism diabetes mellitus pain and fever cancer infections and infestations hypertension and more The authors balance the role of this plant in mythological and religious thinking with advances in modern chemical and pharmacological research Coverage of ethnomedical usage leads to practical discussions of how the unique evolution of the genus *Capparis* impacts present and future applications of the different species for medicine and therapeutic nutrition Providing chemical and pharmacological reviews to an extent not previously undertaken this book will serve as a firm basis for scientists interested in conducting research on this novel source of safe phytoceutical agents **Copy This Book!** Paul J. Heald, 2020-11-24 In **Copy This Book** Paul J Heald draws on a vast knowledge of copyright scholarship and a deep sense of irony to explain what's gone wrong with copyright in the twenty first century Distilling extensive empirical data to clearly show the implications of copyright laws and doctrine for public welfare he illustrates his findings with lighthearted references to familiar and obscure works and their creators and sometimes their creators oddball relations Among the questions he tackles How does copyright deter composers from writing new songs Why are so many famous photographs unprotected orphans and how does Getty Images get away with licensing them What can the use of music in movies tell us about the proper length of the copyright term How do publishers get away with claiming rights in public domain works and extracting unmerited royalties from the public Heald translates piles of data complex laws and mysterious economics equipping readers with the tools for judging past and future copyright law **World Who Is Who and Does What in Environment and Conservation** Nicholas Polunin, 2013-11-05 Qaidu 1236 1301 one of the great rebels in the history of the Mongol Empire was the grandson of Ogedei the son Genghis Khan had chosen to be his heir This boof recounts the dynastic convolutions and power struggle leading up to his rebellion and subsequent events **Education for All 2000-2015: achievements and challenges** UNESCO, 2015-12-31 **Social and Physical Ecologies for Child Resilience: Wisdom from Asia and Africa** Haibin Li, Guanglun Michael Mu, Linda Theron, 2023-11-16 Since Emmy Werner and her team

discovered on the Hawaiian island of Kauai the invincible children who fared well despite exposure to significant household risks there has been proliferating research on child resilience as a positive response to adverse conditions The past five decades have seen significant advancements in and diverse approaches to understanding challenges facilitative factors and positive outcomes in the resilience process that involve children Despite existing and continuously emerging modelings and framings there appears a common understanding that child resilience unfolds through the interactions between individuals and the environments surrounding them This Research Topic therefore takes an ecological approach to child resilience While ecologies constitute social spaces that nurture child resilience they can also refer to the physical environments surrounding children There has been robust empirical evidence suggesting resilience is a shared capacity of the individual and the social ecology e g families schools and communities and more recently of the individual and the physical ecology e g the built or natural environment , *Indigenous Discourses on Knowledge and Development in Africa* Edward Shizha, Ali A.

Abdi, 2013-12-04 African social development is often explained from outsider perspectives that are mainly European and Euro American leaving African indigenous discourses and ways of knowing and doing absent from discussions and debates on knowledge and development This book is intended to present Africanist indigenous voices in current debates on economic educational political and social development in Africa The authors and contributors to the volume present bold and timely ideas and scholarship for defining Africa through its challenges possible policy formations planning and implementation at the local regional and national levels The book also reveals insightful examinations of the hype the myths and the realities of many topics of concern with respect to dominant development discourses and challenges the misconceptions and misrepresentations of indigenous perspectives on knowledge productions and overall social well being or lack thereof The volume brings together researchers who are concerned with comparative education international development and African development research and practice in particular Policy makers institutional planners education specialists governmental and non governmental managers and the wider public should all benefit from the contents and analyses of this book
