

DIVERSITY STATEMENT

If you asked me six years ago, I wouldn't have known what graduate school was, nor what it was designed to do. In fact, I wasn't even sure I wanted to go to college. In my small agricultural town with a population of just over 5,000 people, it was the type of place where family-owned farms and tiny storefronts shaped and defined the community. These types of jobs were passed down throughout the generations, and everyone knew everyone else. My original goal was to take over my parents' farm as soon as I was able to, and I expected to do so as soon as I got my high school diploma. It took one piece of legislation to change all that, and fueled in me a passion for law and policy.

The summer before I was expected to graduate, a piece of legislation was passed that required chicken coops to be constructed in a certain shape fitting different dimensions than what we, and everyone else in the town, possessed. Lawmakers cited the importance of animal welfare in creating the new legislation, but upon performing a few simple calculations, we discovered that the legislation actually decreased each chicken's living space by over 27%. The legislation was a result of lobbying by various chicken suppliers who bought their livestock from farms like ours, who hoped to decrease supply and thus raise prices by forcing farmers to cull their stock. The unfairness of the entire process made me determined to study how these policies are made, and do my part to make a change.

My goal is to represent the interests of my community in the congresses and courts of the country, to ensure that laws are working for the interests of the people and not for the interests of the corporations. In these times, agriculture is already a difficult field to make a living in, and small farming communities like the one I call home are some of the most vulnerable to changes in legislation simply because there is little education and representation on the matter. I hope to attend graduate school in the field of political science because I believe that it will build upon my existing knowledge of the political process and legislation, enabling me to pursue my career and personal goals of obtaining justice for my community now and in the future.

societal contexts So far research suggests that policies implemented in those settings have mixed results This is partly because policies in different fields use distinct conceptual definitions of diversity and inclusion Thus important gaps exist between research and policy implementation and there is little dialogue between research in educational and organizational environments In education inclusive practices focus on students with special needs broader definitions of diversity being neglected In organizations the emphasis is largely on diversity inclusion being a more recent research topic and practice Research conducted at societal level addresses the comprehensive ideologies underlying diversity and inclusion To move forward a dialogue that builds bridges between the various types fundamental vs applied and fields of research educational organizational and societal is crucial Only then can this shared understanding be reached as well as the continuum of goals concepts and practices

CC BY NC ND **Phylogenetic Diversity** Rosa A. Scherson, Daniel P Faith, 2018-08-31 Biodiversity refers to the variety of life It is now agreed that there is a biodiversity crisis corresponding to extinction rates of species that may be 1000 times what is thought to be normal Biodiversity science has a higher profile than ever with the new Intergovernmental Science Policy Platform on Biodiversity and Ecosystem Services involving more than 120 countries and 1000s of scientists At the same time the discipline is re evaluating its foundations including its philosophy and even core definitions The value of biodiversity is being debated In this context the tree of life phylogeny is emerging as an important way to look at biodiversity

with relevance cutting across current areas of concern from the question of resilience within ecosystems to conservation priorities for globally threatened species while capturing the values of biodiversity that have been hard to quantify including resilience and maintaining options for future generations This increased appreciation of the importance of conserving phylogenetic diversity from microbial communities in the human gut to global threatened species has inevitably resulted in an explosion of new indices methods and case studies This book recognizes and responds to the timely opportunity for synthesis and sharing experiences in practical applications The book recognizes that the challenge of finding a synthesis and building shared concepts and a shared toolbox requires both an appreciation of the past and a look into the future Thus the book is organized as a flow from history concepts and philosophy through to methods and tools and followed by selected case studies A positive vision and plan of action emerges from these chapters that includes coping with inevitable uncertainties effectively communicating the importance of this evolutionary heritage to the public and to policy makers and ultimately contributing to biodiversity conservation policy from local to global scales

Investing in Cultural Diversity and Intercultural Dialogue Unesco, 2009-01-01 This report analyses all aspects of cultural diversity which has emerged as a key concern of the

international community in recent decades and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights in particular the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy oriented recommendations to the attention of States, intergovernmental and non governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas: languages, education, communication and new media development and creativity and the marketplace based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how far from being a threat it can become beneficial to the action of the international community.

Biosequestration and Ecological Diversity Wayne A. White, 2012-10-18. Increased throughput of carbon based fossil energy, the destruction of Earth's forests and other land use changes have resulted in ever higher levels of waste in the form of greenhouse gases as well as a diminished capacity of the planet to absorb and store those wastes. This means that to avoid catastrophic global warming and maintain the habitability of the planet, we must find ways to sequester carbon and reduce greenhouse gas emissions.
