School, 1927 *An Evaluation of the Public Schools of the District of Columbia* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee for the Five-Year (2009-2013) Summative Evaluation of the District of Columbia Public Schools, 2015-08-31. *An Evaluation of the Public Schools of the District of Columbia* is a comprehensive five-year summative evaluation report for Phase Two of an initiative to evaluate the District of Columbia's public schools. Consistent with the recommendations in the 2011 report *A Plan for Evaluating the District of Columbia's Public Schools*, this new report describes changes in the public schools during the period from 2009 to 2013. *An Evaluation of the Public Schools of the District of Columbia* examines business practices, human resources, operations, and human capital strategies, academic plans, and student achievement. This report identifies what is working well seven years after legislation was enacted to give control of public schools to the mayor of the District of Columbia and which areas need additional attention.

The Tyranny of Metrics Jerry Z. Muller, 2018-02-06. How the obsession with quantifying human performance threatens our schools, medical care, businesses, and government. Today, organizations of all kinds are ruled by the belief that the path to success is quantifying human performance, publicizing the results, and dividing up the rewards based on the numbers. But in our zeal to instill the evaluation process with scientific rigor, we've gone from measuring performance to fixating on measuring itself. The result is a tyranny of metrics that threatens the quality of our lives and most important institutions. In this timely and powerful book, Jerry Muller uncovers the damage our obsession with metrics is causing and shows how we can begin to fix the problem. Filled with examples from education, medicine, business, and finance, government, the police, and military, and philanthropy and foreign aid, this brief and accessible book explains why the seemingly irresistible pressure to quantify

performance distorts and distracts whether by encouraging gaming the stats or teaching to the test That s because what can and does get measured is not always worth measuring may not be what we really want to know and may draw effort away from the things we care about Along the way we learn why paying for measured performance doesn t work why surgical scorecards may increase deaths and much more But metrics can be good when used as a complement to rather than a replacement for judgment based on personal experience and Muller also gives examples of when metrics have been beneficial Complete with a checklist of when and how to use metrics *The Tyranny of Metrics* is an essential corrective to a rarely questioned trend that increasingly affects us all **Normal Instructor and Teachers World ,1928 World Yearbook of Education 2019** Radhika Gorur,Sam Sellar,Gita Steiner-Khamsi,2018-10-03 Digital methodologies new forms of data visualization and computer based learning and assessment are creating new challenges as well as opportunities for scholars in educational research *The World Yearbook of Education 2019* explores this highly relevant topic opening a new discussion about the various conceptual and methodological challenges and opportunities in contemporary educational research This volume explores contemporary methods of inquiry with chapters organized around four topics of enduring interest in this field impacts patterns relations and contexts *The World Yearbook of Education 2019* comprises contributions from internationally renowned scholars exploring novel concepts and methodologies in grappling with contemporary empirical phenomena in educational research Vital questions such as how we understand the technological developments that are creating new possibilities for and demands on education and how we make sense of complex cases that cut across multiple nations are discussed This newest addition to the prestigious *World Yearbook of Education* series provides a fascinating read for scholars in the fields of education policy and comparative education It is not only a useful resource for educational researchers and policy makers examining new trends and emerging issues but would be of interest to graduate students exploring innovative methodologies particularly in the study of education and education policy **Western Engineering ,1918 Research in Education ,1971-12 *Manorama Year Book* ,1989 **Substance Misuse Prevention Program Attendance** Marni L. Kan,Hsiu Chen Yeh, Lisa M. Schainker,Jessica Nelson,Samantha Charm,Cleve Redmond,Richard Spoth,2022-12-19 Typical life circumstances for military families may impact their participation in prevention programs yet little is known about what factors influence their participation The current study examined predictors of attendance in the Strengthening Families Program For Parents and Youth 10 14 for Military Families a universal in person program designed to improve family functioning and reduce youth substance misuse and other problem behaviors Participants included 159 parent child dyads randomly selected to be offered the 7 week family program Analyses examined demographic characteristics deployment experiences time spent waiting for the program to begin and psychosocial functioning as predictors of attendance in a series of regression models Of the 39 percent of families that attended any program sessions the majority 71 percent attended at least four of the seven sessions Attendance varied significantly across**

the geographic areas in which groups were held Prior service utilization youth conduct problem behavior parental history of deployment and family conflict were each positively associated with attendance whereas parent tobacco use was negatively associated with attendance These results highlight the challenges in recruiting military families into in person prevention programs and suggest that extra efforts may be needed to engage families that do not perceive that they have a need for support

Proceedings ,1912 Educational Inequality and School Finance Bruce D. Baker,2021-02-09 In Educational Inequality and School Finance Bruce D Baker offers a comprehensive examination of how US public schools receive and spend money Drawing on extensive longitudinal data and numerous studies of states and districts he provides a vivid and dismaying portrait of the stagnation of state investment in public education and the continuing challenges of achieving equity and adequacy in school funding Baker explores school finance the school and classroom resources derived from school funding and how and why those resources matter He provides a critical examination of popular assumptions that undergird the policy discourse around school funding notably that money doesn t matter and that we are spending more and getting less and shows how these misunderstandings contribute to our reluctance to increase investment in education at a time when the demands on our educational system are rising Through an introduction to the concepts of adequacy equity productivity and efficiency Baker shows how these can be used to evaluate policy reforms He argues that we know a great deal about the role and importance of money in schools the mechanisms through which money matters for student outcomes and the trade offs involved and he presents a framework for designing and financing an equitable and adequate public education system with balanced and stable sources of revenue Educational Inequality and School Finance takes an issue all too often relegated to technical experts and makes it accessible for broader public empowerment and engagement

The Role of Intergovernmental Fiscal Transfers in Improving Education Outcomes Samer Al-Samarrai,The World Bank,Blane Lewis,2021-07-23 The majority of the world s children live in countries where local governments are responsible for the provision of basic education services Although subnational governments manage their own education systems they often rely on transfers from the central government for funding The main purpose of this study is to assess how these fiscal transfers affect public funding for education and how they ultimately affect student schooling and learning outcomes Through a careful analysis of how fiscal transfers have affected education systems in different contexts the investigation develops a set of principles to support improvements in the design and implementation of transfer systems with a specific focus on the provision of education services The study is centered on seven country case studies that aim to answer a set of common research questions using a similar approach Country case studies were conducted in Brazil Bulgaria China Colombia Indonesia Sudan and Uganda The analysis shows that fiscal transfer mechanisms can improve the adequacy of public education spending reduce spending inequalities between regions and improve spending efficiency Moreover the study highlights that carefully designed and implemented transfer systems can help raise overall education outcomes and reduce
