Innovation, Regional Development and the Life Sciences Kean Birch, 2016-10-14 The life sciences is an industrial sector that covers the development of biological products and the use of biological processes in the production of goods services and energy This sector is frequently presented as a major opportunity for policy makers to upgrade and renew regional economies leading to social and economic development through support for high tech innovation Innovation Regional Development and the Life Sciences analyses where innovation happens in the life sciences why it happens in those places and what this means for regional development policies and strategies Focusing on the UK and Europe its arguments are relevant to a variety of countries and regions pursuing high tech innovation and development policies The book s theoretical approach incorporates diverse geographies e g global national and regional and political economic forces e g discourses governance and finance in order to understand where innovation happens in the life sciences where and how value circulates in the life sciences and who captures the value produced in life sciences innovation This book will be of interest to researchers students and policy makers dealing with regional local economic development

Styles of Reasoning in the British Life Sciences James Elwick, 2015-07-17 Explores how the concept of compound individuality brought together life scientists working in pre Darwinian London This book states that scientists conducting research in comparative anatomy physiology cellular microscopy embryology and the neurosciences repeatedly stated that plants and animals were compounds of smaller independent units

The Life Cycle of Clusters Dirk Fornahl, Robert Hassink, 2017-04-28 One size fits all cluster policies have been rightly criticized in the literature One promising approach is to focus cluster policies on the specific needs of firms depending on the stage of development emergence growth sustainment or decline their cluster is in In this highly insightful book these stage specific cluster policies are analysed and evaluated Moreover several chapters also focus on smart specialization policies to promote regional development by taking into account the emergence and adaptation of clusters and industries

Data Integration in the Life Sciences Norman W. Paton, Paolo Missier, Cornelia Hedeler, 2009-07-21 Data integration in the life sciences continues to be important but challenging The ongoing development of new experimental methods gives rise to an increasingly wide range of data sets which in turn must be combined to allow more integrative views of biological systems Indeed the growing

prominence of systems biology where mathematical models characterize behaviors observed in experiments of different types emphasizes the importance of data integration to the life sciences In this context the representation of models of biological behavior as data in turn gives rise to challenges relating to provenance data quality annotation etc all of which are associated with significant research activities within computer science The Data Integration in the Life Sciences DILS Workshop Series brings together data and knowledge management researchers from the computer science research community with bioinformaticians and computational biologists to improve the understanding of how emerging data integration techniques can address requirements identified in the life sciences The Oxford Handbook of Innovation Jan Fagerberg,David C.

Mowery,Richard R. Nelson,2006-01-19 This handbook provides academics and students with a comprehensive and holistic understanding of the phenomenon of innovation *Vitalism and Its Legacy in Twentieth Century Life Sciences and Philosophy* Christopher Donohue,Charles T. Wolfe,2023-01-02 This Open Access book combines philosophical and historical analysis of various forms of alternatives to mechanism and mechanistic explanation focusing on the 19th century to the present It addresses vitalism organicism and responses to materialism and its relevance to current biological science In doing so it promotes dialogue and discussion about the historical and philosophical importance of vitalism and other non mechanistic conceptions of life It points towards the integration of genomic science into the broader history of biology It details a broad engagement with a variety of nineteenth twentieth and twenty first century vitalisms and conceptions of life In addition it discusses important threads in the history of concepts in the United States and Europe including charting new reception histories in eastern and south eastern Europe While vitalism organicism and similar epistemologies are often the concern of specialists in the history and philosophy of biology and of historians of ideas the range of the contributions as well as the geographical and temporal scope of the volume allows for it to appeal to the historian of science and the historian of biology generally *Data Integration in the Life Sciences* Naveen Ashish,Jose-Luis Ambite,2015-07-07 This book constitutes the proceedings of the 11th International Conference on Data Integration in the Life Sciences DILS 2015 held in Los Angeles CA USA in July 2015 The 24 papers presented in this volume were carefully reviewed and selected from 40 submissions They are organized in topical sections named data integration technologies ontology and knowledge engineering for data integration biomedical data standards and coding medical research applications and graduate student consortium

Regional Development in the Knowledge Economy Philip Cooke,Andrea Piccaluga,2006-09-27 International contributors provide the first examination of the growing subject of regional knowledge economy development Illustrated by data and stylized accounts the international contributors chart the evolution of knowledge economies questioning the way in which they work and criticize accepted theories and inform how places can cope in the knowledge economy Based in concept on Cooke s Knowledge Economies Routledge 2002 Regional Development in the Knowledge Economy is a well grounded work exploring this increasingly important theme with relevance to innovation systems and related economic development
