

Philosophy of Nursing Paper

When writing about a personal nursing philosophy you should know what exactly a nursing philosophy is. Nursing is a professional career within a healthcare sector setting that focuses on caring for the wounded or ill and in some cases, such as the labor and delivery unit, you care for healthy patients. You are not limited to a specific criterion for those you care for. You may care for entire families or only one individual from a family. Nursing should encompass the concepts of patients, health, environment, and nurse with the quality of caring. (Ryan, 2016) "Philosophy is the study of wisdom, fundamental knowledge, and the processes used to develop and construct one's perceptions of life. Philosophy provides a viewpoint and implies a system of values and beliefs. Each individual develops a personal philosophy to give meaning to experiences and to guide behavior and attitudes. Personal philosophies are developed by learning from interpersonal relationships, through formal and informal educational experiences, through religion and culture, and from the environment" (Taylor, Lillis, Lynn, & LeMone, 2015).

Nursing is not just a career that I can achieve, it is also something that can benefit my self-worth. Being a nurse does not only take significant skill, time and education, but it also takes heart. If you are not someone who enjoys helping people and learning new things as you go along, then nursing may not be the right fit for someone. To be a good nurse, it takes a lot of patience, have a willingness to grow and learn, and requires you to be very caring and thoughtful. You must want to help others around you and achieve a love and a drive to succeed in a goal such as helping a patient achieve optimal health or make it through a hardship.

There is a list of specific characteristics that should accompany every good nurse. Communication is one of the key characteristics, since you use it to build a patient-nurse relationship and use it to maintain a solid foundation in your work setting. Attention to detail because, one small mistake can do more harm than help and it's crucial to keep your patients safe. Empathy, emotional stability and flexibility because, you are in an area where tremendous amounts of tragic and traumatic incidents can happen. A good nurse must be able to handle the pressure while still staying focused and successfully caring for the people around. Problem solving skills and quick response is another characteristic that's crucial. A nurse must be able to quickly identify a problem and do what's necessary to correct the problem in a timely and acceptable manner. Time is of the essence in the nursing field. Finally, a good nurse must have respect for others. Respect can go a long way in helping build a relationship that's trusting and kind, weather that be in patients, their families or coworkers. (Hughes, 2015)
