**Abstract:** This paper examines the role of Japanese dyeing stencils, *katagami*, in the Vienna Workshops (Wiener Werkstätte 1903-1932). Main subjects of the study are *katagami* from the Siebold Collection in the Austrian Museum for Applied Arts in Vienna (MAK) and textiles by the Workshops after the 1910s. This research will clarify the course of cultural exchange between Japan and Vienna, and new relationship between European and Japanese design in the 20th century.

Since the *katagami* were used as teaching materials at the attached school of the Museum of Art and Industry, many Workshops' designers stemming from the school later adopted the *katagami* stylistic elements. This tendency was supported by the fact that the Workshops had to diversify their scope of products. Thus the *katagami* were utilized within the enterprise's marketing strategy. Transformed Japanese patterns were later exported to European countries and the U.S.A. via the textiles of the Vienna Workshops.

**Keywords:** *Katagami (Japanese dyeing stencil), the Siebold Collection, the Vienna Workshops, textile design.*

## 1. Introduction

The purpose of this paper is to examine the influence of Japanese *katagami* [1] on Austrian modern design in the first half of the 20th century. The Siebold Collection in the Austrian Museum for Applied Art in Vienna (MAK) was essential for the spread of that influence.

The collection of Heinrich von Siebold (1852-1908) was one of the largest Japanese art collections in Europe in that period. In 1907, the Imperial Museum of Art and Industry (k.k. Museum für Kunst und Industrie, est. 1864, now MAK) inherited this collection, which at that time comprised over 8,000 Japanese *katagami*. *Katagami* were imported to Europe in the late 19th century along with other Japanese artworks and have been a source of inspiration for the *Flächenkunst* (planar art) of art nouveau.

**Radio Critics and Popular Culture** Paul Rixon, 2018-04-20 Radio still remains an important form of media with millions listening to it daily. It has been reborn for the digital era and is an area where there is great interest in its development, role, and form. Attempting to fill the gap in research on British radio criticism, this volume explores the development and role of radio criticism in the discourse around radio in Britain from its birth in the 1920s up to the present day. Using a historical approach to explore how, as radio emerged, the press provided coverage which helped shape and reflect radio's position in popular culture, Paul Rixon delivers an interesting and engaging exploration that provides a cultural perspective on radio with a specific focus on newspaper criticism. *Radio Critics and Popular Culture* is an innovative and original addition to existing research and will be invaluable for those interested in the way that British radio has evolved.

Cultural Conceptions of Mental Health and Therapy Anthony J. Marsella,G. White,1982-04-30

Within the past two decades there has been an increased interest in the study of culture and mental health relationships This interest has extended across many academic and professional disciplines including anthropology psychology sociology psychiatry public health and social work and has resulted in many books and scientific papers emphasizing the role of sociocultural factors in the etiology epidemiology manifestation and treatment of mental disorders It is now evident that sociocultural variables are inextricably linked to all aspects of both normal and abnormal human behavior But in spite of the massive accumulation of data regarding culture and mental health relationships sociocultural factors have still not been incorporated into existing biological and psychological perspectives on mental disorder and therapy Psychiatry the Western medical specialty concerned with mental disorders has for the most part continued to ignore socio cultural factors in its theoretical and applied approaches to the problem The major reason for this is psychiatry s continued commitment to a disease conception of mental disorder which assumes that mental disorders are largely biologically caused illnesses which are universally represented in etiology and manifestation Within this perspective mental disorders are regarded as caused by universal processes which lead to discrete and recognizable symptoms regardless of the culture in which they occur However this perspective is now the subject of growing criticism and debate
