**The Metaphysics of Technology** David Skrbina,2014-07-25 What is technology Why does it have such power in our lives Why does it seemingly progress of its own accord and without regard to social or environmental well being The quest for the essence of technology is an old one with roots in the pre Socratic philosophy of ancient Greece It was then that certain thinkers first joined the ideas of techn and logos into a single worldview The Greeks saw it as a kind of world force present in both the works of men and in nature itself It was the very creative power of the cosmos In the 20th century German thinkers like Dessauer Juenger and Heidegger sought the metaphysical basis of technology with varying success French theologian Jacques Ellul argued persuasively that technology was an autonomous force of nature that determined all aspects of human existence but he neglected the metaphysical underpinnings Recent writers in the philosophy of technology have generally eschewed metaphysics altogether preferring to concentrate on constructivist models or pragmatic analyses In the present work Skrbina returns to a classic metaphysical approach seeking not so much an essence of technology but rather a deep and penetrating analysis of the entire technological phenomenon Drawing on the Greeks he argues for a teleological metaphysics in which increasing order in the universe is itself defined as a technological process On this reading all of reality constitutes a technical sphere a pantechnikon of universal scope This work the first ever book length treatment of the topic breaks new ground by providing an in depth and critical study of the metaphysics of technology as well as drawing out the practical consequences Technology poses significant risks to humanity and the planet risks that can be mitigated through a detailed philosophical analysis

**After-Development Dynamics** Anthony P. D'Costa,2015-07-30 The South Korean economic development trajectory has been widely studied and is well understood From an impoverished war torn nation the country has progressed on all fronts including a ten fold increase in per capita income over a 40 year period It stands out internationally when it comes to education and politically it has moved away from authoritarianism to a more spirited democratic system In short it seems to have achieved it all The question then is what does a country do after it has attained development This volume examines Korea s strategic engagement with Asia as a response to the limits of the home market Access to new markets and resources in Asia through exports and foreign investment are critical Additionally with Korea s ongoing demographic crisis its engagement with foreign workers is also inevitable After Development Dynamics explores how Korea is responding through regional integration strategic industrial upgrading of exports foreign markets and resources and coping with migrants including unskilled workers students and professionals The transfer of Korean business and employment practices through investment to other countries and accommodating foreigners is not trouble free Further prosperity imposes demands for increased social welfare while the workings of contemporary global capitalism introduce new sources of inequality Sharing that prosperity with small firms irregular workers and women becomes critical This volume presents the key internal challenges facing Korean society and suggests multiple ways to address them as a related

response to Korea's after development prosperity
