Popular Appeal Lesley Hawkes, Vivienne Muller, Sharyn Pearce, 2013-11-18 Now is an opportune moment to consider the shifts in youth and popular culture that are signalled by texts that are being read and viewed by young people In a world seemingly compromised by climate change political and religious upheavals and economic irresponsibility and at a time of fundamental social change young people are devouring fictional texts that focus on the edges of identity the points of transition and rupture and the assumption of new and hybrid identities This book draws on a range of international texts to address these issues and to examine the ways in which key popular genres in the contemporary market for young people are being re defined and re positioned in the light of urgent questions about the environment identity one's place in the world and the fragile nature of the world itself The key questions are What are the shifts and changes in youth culture that are identified by the market and by what young people read and view How do these texts negotiate the addressing of significant questions relating to the world today Why are these texts so popular with young people What are the most popular genres in contemporary best sellers and films Do these texts have a global appeal and if so why These overarching themes and ideas are presented as a collection of inter related essays exploring a rich variety of forms and styles from graphic novels to urban realism from fantasy to dystopian writing from epic narratives to television musicals The subjects and themes discussed here reveal the quite remarkable diversity of issues that arise in youth fiction and the variety of fictional forms in which they are explored Once seen as not as important as adult fiction this book clearly demonstrates that youth fiction and the popular appeal of this fiction is complex durable and far reaching in its scope

Why the Iraqi

Resistance to the Coalition Invasion was So Weak Stephen T. Hosmer, 2007 Research brief summarizes an analysis of information derived from interviews with former senior Iraqi officials to determine factors contributing to the rapid collapse of Iraqi resistance to the Coalition invasion of Iraq in March and April 2003 *The Character of War in the 21st Century* Caroline Holmqvist-Jonsäter, Christopher Coker, 2009-12-04 This edited volume addresses the relationship between the essential nature of war and its character at the beginning of the twenty first century The focus is on the conflicts in Iraq and Afghanistan situations that occupy a central role in international affairs and that have become highly influential in thinking about war in the widest sense The intellectual foundation of the volume is Clausewitz s insight that though war has an enduring nature its character changes with time space social structure and culture The fact that war s character varies means that different actors may interpret experience and ultimately wage war differently The conflict between the ways that war is conceptualised in the prevailing Western and international discourse and the manner in which it plays out on the ground is a key discussion point for scholars and practitioners in the field of international relations Contributions combine insights from social theory philosophy sociology and strategic studies and ask directly what contemporary war is and what the implications are for the future This book will be of much interest to students of war studies strategic studies security studies and IR in general Caroline Holmqvist Jonsäter is currently completing a PhD in the conflation of war and policing in international conflicts at the Department of War Studies King s College London Christopher Coker is Professor of International Relations at the London School of Economics and Political Science LSE He is the author of 11 books on war and security issues [The Social Outcast](#) Kipling D. Williams, Joseph P. Forgas, William Von Hippel, 2013-05-13 This book focuses on the ubiquitous and powerful effects of ostracism social exclusion rejection and bullying Human beings are an intrinsically gregarious species Most of our evolutionary success is no doubt due to our highly developed ability to cooperate and interact with each other It is thus not surprising that instances of interpersonal rejection and social exclusion would have an enormously detrimental impact on the individual Until 10 years ago however social psychology regarded ostracism rejection and social exclusion as merely outcomes to be avoided but we knew very little about their antecedents and consequences and about the processes involved when they occurred Furthermore the literatures of ostracism social exclusion and rejection have not until now included discussions of the bullying literature **Purpose and Power** Donald Stoker, 2024-01-11 Across the full span of the nation s history Donald Stoker challenges our understanding of the purposes and uses of American power From the struggle for independence to the era of renewed competition with China and Russia he reveals the grand strategies underpinning the nation s pursuit of sovereignty security expansion and democracy abroad He shows how successive administrations have projected diplomatic military and economic power and mobilized ideas and information to preserve American freedoms at home and secure US aims abroad He exposes the myth of American isolationism the good and ill of America s quest for democracy overseas and how too often its administrations have lacked clear political aims or a concrete

vision for where they want to go Understanding this history is vital if America is to relearn how to use its power to meet the challenges ahead and to think more clearly about political aims and grand strategy

Monumentality and the Roman Empire Edmund Thomas,2007-11-16 The quality of monumentality is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire It is this quality that has helped to make them enduring models for builders of later periods This extensively illustrated book the first full length study of the concept of monumentality in Classical Antiquity asks what it is that the

notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective aspirations and identities Although no single word existed in antiquity for the qualities that modern authors regard as making up that term its Latin derivation from monumentum a monument attests plainly to the presence of the concept in the mentalities of ancient Romans and the development of that notion through the Roman era laid the foundation for the classical ideal of monumentality which reached a height in early modern Europe This book is also the first full length study of architecture in the Antonine Age when it is generally agreed the Roman Empire was at its height By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings the architects who designed them and the public who used and experienced them Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself
