Paper 1 Agric 2013 Memo:

Global Agriculture and the American Farmer Kimberly Ann Elliott, 2017-06-27 The United States is one of the world's largest producers and exporters of a range of agricultural commodities and the largest provider of foreign assistance so U.S. policies have big effects on global food security and other global public goods linked to agriculture. On the positive side of the ledger President Obama created the Feed the Future aid initiative to promote agricultural development in poorer countries as a tool to achieve the global goals of ending hunger and extreme poverty which are mostly rural. But that generosity is undercut by U.S. support for farmers that distorts global markets and ignores negative spillovers for the rest of the world. In this book Elliott focuses on three policy areas that are particularly damaging for developing countries: traditional agricultural subsidy and trade policies that support the incomes of American farmers at the expense of farmers elsewhere; the biofuels mandate which in its current form increases market volatility while doing little if anything to mitigate climate change; and weak regulation of antibiotic use in livestock which contributes to the global spread of drug-resistant super bugs. While noting that broad reforms are needed to fix these problems, Elliott also identifies practical steps that U.S. policymakers could take in the relatively short run to improve farm policies for American taxpayers and consumers as well as for the poor and vulnerable in developing countries.

2013 Global Food Policy Report Fan, Shenggen, Polman, Paul, Kishore, Avinash, Joshi, Pramod Kumar, Hoddinott, John F., Ringler, Claudia, Cenacchi, Nicola, Koo, Jawoo, Robertson, Richard, Fisher, Myles, Cox, Cindy, Perez, Nicostrato, Garrett, Karen, Rosegrant, Mark W., Beintema, Nienke, Stads, Gert-Jan, Torero, Maximo, Gillespie, Stuart, Badiane, Ousmane, Makombe, Tsitsi, Collins, Julia, Breisinger, Clemens, Al-Riffai, Perrihan, Ecker, Olivier, Saade, Maurice, Akramov, Kamiljon, Cohen-Cline, Noah, Chen, Kevin, Timmer, Peter, Díaz-Bonilla, Eugenio, 2014-03-12 This 2013 Global Food Policy Report is the third in an annual series that provides an in-depth look at major food policy developments and events. Initiated in response to resurgent interest in food and nutrition security, the series offers a yearly overview of the food policy developments that have contributed to or hindered progress in achieving food and nutrition security. It reviews what happened in food policy and why, examines key challenges and opportunities, shares new evidence and knowledge, and highlights emerging issues.

Macroeconomics, agriculture, and food security Díaz-Bonilla, Eugenio, 2015-10-27 Why write a book on macroeconomic policies and their links to agriculture and food security in developing countries? The food price spikes of the years just prior to 2010 and the economic, political, and social dislocations they generated refocused the attention of policymakers and development practitioners on the agricultural sector and food security concerns. But even without those traumatic events, the importance of agriculture for developing countries and for an adequate functioning of the world economy cannot be denied. First, although declining over time, primary agriculture still represents important percentages of developing countries' overall domestic production, exports, and employment. If agroindustrial, transportation, commercial, and other related activities are also counted, then the economic and social importance of agriculture based

sectors increases significantly Furthermore large numbers of the world s poor still live in rural areas and work in agriculture Through the links via production trade employment and prices agricultural production is also crucial for national food security Second it has been shown that agriculture in developing countries has important growth and employment multipliers for the rest of the economy and agriculture seems to have larger positive effects in reducing poverty than growth in other sectors Third agriculture is not only important for individual developing countries but it has global significance considering the large presence of developing countries in world agricultural production and the increasing participation in international trade of those products these three points will be covered in greater detail in Chapter 1

The Oxford Handbook of Africa and Economics Célestin Monga,Justin Yifu Lin,2015-07-02 A popular myth about the travails of Africa holds that the continent s long history of poor economic performance reflects the inability of its leaders and policymakers to fulfill the long list of preconditions to be met before sustained growth can be achieved These conditions are said to vary from the necessary quantity and quality of physical and human capital to the appropriate institutions and business environments While intellectually charming and often elegantly formulated that conventional wisdom is actually contradicted by historical evidence and common sense It also suggests a form of intellectual mimicry that posits a unique path to prosperity for all countries regardless of their level of development and economic structure In fact the argument underlining that reasoning is tautological and the policy prescriptions derived from it are fatally teleological low income countries are by definition those where such ingredients are missing None of today s high income countries started its growth process with the required and complete list of growth ingredients Unless one truly believes that the continent of Africa and most developing countries are ruled predominantly if not exclusively by plutocrats with a high propensity for sadomasochism the conventional view must be re examined debated and questioned This volume the second of the lOxford Handbook of Africa and Economics reassesses the economic policies and practices observed across the continent since independence It offers a collection of analyses by some of the leading economists and development thinkers of our time and reflects a wide range of perspectives and viewpoints Africa s emergence as a potential economic powerhouse in the years and decades ahead amply justifies the scope and ambition of the book

Regulating Short Food Supply Chains in the EU Mirta Alessandrini, 2024-11-30 This volume presents a thorough analysis of the concept and role of Short Food Supply Chains SFSCs within the EU legal framework with a two fold aim first it shows the pitfalls of the current legal scenario which often limits alternatives rather than promoting them and second it provides a new conceptualisation for SFSCs under EU law by delineating and integrating all their

distinctive features Agricultural landscapes in the EU are now undergoing fundamental changes revealing an increasing interest in SFSCs as a tool for promoting both local products and their food systems Despite being the backbone of the EU agricultural system SFSCs position in the current socioeconomic narrative has not been sufficiently fostered In response the book traces how SFSCs have historically been dealt with under the agricultural rules of the CAP and to a much lesser extent those relating to internal market food law delving into the intricate relationship between agricultural and food law The integration of these two disciplines into an agri food law domain represented a pivotal shift in legal discourse in particular in the context of SFSC regulation The legal analysis extends its scope to encompass spatial and historical dimensions enriching the contextual understanding of regulatory frameworks over time and across geographical boundaries This new conceptualisation does not aim to establish a universal set in the stone legal definition for SFSC applicable across disciplines Rather it seeks to identify common themes and key features among various SFSC initiatives These themes serve as the foundation for determining a set of minimum legal requirements for the recognition and valorisation of SFSC initiatives at the EU level which Member States can then tailor to their specific needs The goal is to lay the groundwork for developing a concept that can be effectively operationalised across different sectors and geographical dimensions The book makes a substantial contribution to the current academic debate filling a significant gap in the existing CAP literature On the one hand it provides the first comprehensive and systematic analysis of all the measures that have addressed small farmers and SFSCs from the CAP reforms up to the present day On the other by adopting a new multidisciplinary perspective encompassing legal sociological and agri food studies it raises new questions on the role of short supply chains in light of the Farm to Fork Strategy and beyond

Food Security, Agricultural Policies and Economic Growth Niek Koning,2017-04-21 Using a political economic approach supplemented with insights from human ecology this volume analyzes the long term dynamics of food security and economic growth The book begins by discussing the nature of preindustrial food crises and the changes that have occurred since the 19th century with the ascent of technical science and the fossil fuel revolution It explains how these changes improved living standards but that the realization of this improvement was usually dependent on government support for smallholder modernization The author sets out how the evolution of food security in different regions has been influenced by farm policy choices and how these choices were shaped by local societal characteristics international relations and changing configurations in metropolitan countries Separate chapters are devoted to the interaction of this evolution with debates on food security and economic growth and with international economic policies The final chapters highlight the new challenges for global food security that will arise as traditional sources of biomass production and the more easily extractable reserves of fossil biomass become depleted or can no longer be used Overall the book emphasizes the inadequacy of current explanations with regard to these challenges It explores what is needed to ensure a sustainable future and calls for a rethinking of these issues a necessary reflection in today s unstable global political situation
