Molina,Sunaina Shenoy,2022-12-30 Based on policy analysis and empirical data this book examines the problematic consequences of colonial legacies of language policies and English language education in the multilingual contexts of the Global South Using a postcolonial lens the volume explores the raciolinguistics of language hierarchies that results in students from low income backgrounds losing their mother tongues without acquiring academic fluency in English Using findings from five major research projects the book analyzes the specific context of India where ambiguous language policies have led to uneasy tensions between the colonial language of English national and state languages and students linguistic diversity is mistaken for cognitive deficits when English is the medium of instruction in schools The authors situate their own professional and personal experiences in their efforts at dismantling postcolonial structures through reflective practice as teacher educators and present solutions of decolonial resistance to linguistic hierarchies that include critical pedagogical alternatives to bilingual education and opportunities for increased teacher agency Ultimately this timely volume will appeal to researchers scholars academics and students in the fields of international and comparative education English and literacy

studies and language arts more broadly Those interested in English language learning in low income countries specifically will also find this book to be of benefit to their research *Fundamental Considerations in Technology Mediated Language Assessment* Karim Sadeghi, Dan Douglas, 2023-04-27 *Fundamental Considerations in Technology Mediated Language Assessment* aims to address issues such as how the forced integration of technology into second language assessment has shaped our understanding of key traditional concepts like validity reliability washback authenticity ethics fairness test security and more Although computer assisted language testing has been around for more than two decades in the context of high stakes proficiency testing much of language testing worldwide has shifted to at home mode and relies heavily on the mediation of digital technology making its widespread application in classroom settings in response to the COVID 19 outbreak unprecedented Integration of technology into language assessment has brought with it countless affordances and at the same time challenges both theoretically and practically One major theoretical consideration requiring attention is the way technology has contributed to a reconceptualization of major assessment concepts constructs There is very limited literature available on the theoretical underpinnings of technology mediated language assessment This book aims to fill this gap This book will appeal to academic specialists practitioners or professionals in the field of language assessment advanced and or graduate students and a range of scholars or professionals in disciplines like educational technology applied linguistics and teaching English to speakers of other languages TESOL *China-Africa Relations* Kathryn Batchelor, Xiaoling Zhang, 2017-06-26 The recent rapid growth in China s involvement in Africa is being promoted by both Chinese and African leaders as being conducted in a spirit of cooperation friendship and equality In the media and informally however a different less harmonious picture emerges This book explores how China and Africa really regard each other how official images are manufactured and how informal images are nevertheless shaped and put forward The book covers a wide range of areas where China Africa exchange exists including diplomacy technological cooperation sport culture and arts exchange The book also discusses the historical development of the relationship and how it is likely to develop going forward *Handbook of Literacy in Akshara Orthography* R. Malatesha Joshi, Catherine McBride, 2019-06-11 This volume examines the unique characteristics of akshara orthography and how they may affect literacy development and problems along with the implications for assessment and instruction Even though akshara orthography is used by more than a billion people there is an urgent need for a systematic attempt to bring the features research findings and future directions of akshara together in a coherent volume We hope that this volume will bridge that gap Akshara is used in several Indic languages each calling it by a slightly different name for example aksharamu in Telugu akshara in Kannada and akshar in Hindi It is the Bhrami derived orthography used across much of the Indian subcontinent There is a growing body of research on the psycholinguistic underpinnings of learning to read akshara and the emerging perspective is that akshara even though classified as alphasyllabaries abugida and semi syllabic writing systems is neither alphabetic nor syllabic Rather akshara orthography is

unique and deserves to be a separate classification and needs further investigation relating to literacy acquisition in akshara. The chapters in this volume written by leading authors in the field will inform the reader of the current research on akshara in a coherent and systematic way.

Transformative Pedagogical Perspectives on Home Language Use in Classrooms Jules, Janice E., Belgrave, Korah L., 2020-09-25. Linguists, researchers, and other practitioners in language education acknowledge that the resolution of language problems associated with breaking down language and cultural barriers that hinder the growth of learners' self-identities and national identities is ongoing. In fact, even with decades of research in home language use in the classroom, there are still classrooms worldwide where learners are deprived of the opportunity of building their self-esteem, confidence, and autonomy by communicating with their native language. The global nature of communication requires speakers to use all the languages in their repertoire effectively, thus reinforcing the need to encourage home language use in classrooms. *Transformative Pedagogical Perspectives on Home Language Use in Classrooms* is a cutting-edge research publication on the effective use of home language in the classroom that emphasizes the significance of this activity to the success of the overall language development of the learner. Particular attention is given to transformative pedagogy and the provision of valuable insights into how the teacher can guide and assist learners in the development of critical thinking skills. In addition, the book provides content that enables practitioners in language education and parents to explore their roles in assisting children in breaking down the language and cultural barriers that hinder the growth of their self-identity and national identity. Highlighting topics such as engineering education, cultural responsiveness, and transformative pedagogy, this book is essential for linguists, academicians, education professionals, curriculum designers, policymakers, administrators, instructional designers, researchers, and students.
