Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoengineering The Idea Factory Jon Gertner, 2013-02-26 The definitive history of America's greatest incubator of innovation and the birthplace of some of the 20th century's most influential technologies Filled with colorful characters and inspiring lessons The Idea Factory explores one of the most critical issues of our time What causes

Osanloo, Cosette M. Grant, 2015-06-01 This authoritative handbook examines the community district and teacher leadership roles that affect urban schools It will serve as a foundation for pedagogical and educational leadership practices that foster social justice equity and advocacy for those who have been traditionally and historically underserved in education The handbook s ten sections cover topics as diverse as curriculum instruction and educational outcomes gender race and class higher education and leadership preparation and support Its twenty nine chapters offer both American and international perspectives *The Hero of Budapest* Bengt Jangfeldt, 2013-11-28 The story of Raoul Wallenberg the Swedish businessman who at immense personal risk rescued many of Budapest s Jews from the Holocaust and subsequently disappeared into the Soviet prison system is one of the most fascinating episodes of World War II Yet the complete story of his life and fate can only be told now and for the first time in this book following access to the Russian and Swedish archival sources previously not used Born into a wealthy Swedish family Wallenberg was a moderately successful businessman when he was recruited by the War Refugee Board to manage the rescue mission of thousands of Hungarian Jews Once in Budapest he created and distributed so called protective passports or Schutz Pass among the Jewish population thus managing to save up to 8 000 people Through the safe houses and clandestine networks that he established around the city many thousands more were saved from the concentration camps Yet when Budapest was liberated by the Red Army in January 1945 Wallenberg was arrested and taken to Moscow One of the reasons for his arrest was that the Soviets could not understand the nature of his mission formally he was a Swedish diplomat but he worked for an American agency On the basis of previously unseen Soviet sources Jangfeldt has been able to reconstruct the events surrounding Wallenberg s arrest almost hour by hour and for the first time he presents a highly plausible theory about the reasons why Wallenberg was arrested and what happened to him after he disappeared With access to previously unpublished material Bengt Jangfeldt provides the first complete account of

Wallenberg's life from his childhood in Sweden to his disappearance in a Russian jail and sheds important new light on one of the greatest heroes of World War II This is a thrilling tale of intrigue espionage and heroism which will captivate all readers of modern European history

Integer Programming and Related Areas C. Kastning, 2013-11-11 Integer Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries
