Illustrated glossary of paper conservation:
damages and treatments Silvana Bojanoski, Márcia Almada, 2021-12-10 The preparation of specialized glossaries and dictionaries is a fundamental stage in the consolidation of an area of knowledge since associated with the terms are concepts which necessarily requires thinking about assessing and at times reconsidering the vocabulary used by professionals in a specialized area The production of a multilingual glossary in seeking equivalent terms in different languages is a great challenge but gains a special dimension by showing the approximations and or the conceptual variations which exist in different countries We understand that the precise designation of the physicochemical phenomenon associated with damage

is essential for technical and scientific communication Similarly the presentation of the most common treatments used by paper conservators with clear and objective definitions facilitates communication among professionals The Illustrated Glossary of Paper Conservation damages and treatments English Portuguese Spanish Greek presents equivalences in four languages of terms and definitions related to bidimensional objects on paper in other words works of art manuscripts and engravings

Special libraries are facing increasing challenges today The biggest challenge before them is how to demonstrate that they

are the best source of specialized information despite reliance on the web for information. Special libraries therefore need to change in terms of their collections, roles, services, and evolve strategies for managing the change. Preservation refers to the set of activities that aims to prolong the life of a record and relevant metadata or enhance its value or improve access to it through noninterventive means. This includes actions taken to influence records creators prior to selection and acquisition. The purpose of preservation is to ensure protection of information of enduring value for access by present and future generations. Libraries and archives have served as the central institutional focus for preservation, and both types of institutions include preservation as one of their core functions. In recent decades, many major libraries and archives have established formal preservation programs for traditional materials, which include regular allocation of resources for preservation, preventive measures to arrest deterioration of materials, remedial measures to restore the usability of selected materials, and the incorporation of preservation needs and requirements into overall program planning. This book attempts to provide all basic aspects of digital library in an authentic but simple style. It describes the revolutionary changes brought out by digital libraries in the entire concept of library organisation, management, and operations. It also discusses the challenges emerging due to the adoption of newer technologies.
