this can be just a representation of the sea itself but to give the model a context even to tell some sort of story is far more challenging This is the province of the diorama which at its most effective is a depiction of a scene or an event in which the ship model takes centre stage As with a painting the composition is a vital element and this book devotes much of its space to what works and what does not and illustrates with photographic examples why the best maritime dioramas have visual power and how to achieve that impact Individual chapters explore themes like having small craft in attendance on the main subject multiple model scenarios dockyards and naval bases and the difficulties of replicating naval combat realistically It also looks at both extremes of modelmaking ambition the small single ship exposition and the largest most ambitious projects of the kind meant for museum display The book concludes with some of the most advanced concepts how to create drama and the illusion of movement and how to manipulate perspective Illustrated throughout with colour photos the more abstract discussion is backed with practical how to sections so anyone who builds waterline ship model will benefit from reading this book As featured in Glasgow Now
