**GIScience Teaching and Learning Perspectives** Shivanand Balram, James Boxall, 2019-01-31 This volume uniquely links educational theories and the practice of GIScience in higher education contexts to guide classroom practice present effective practical implementations from peers and provide resources and strategies for effective teaching methods The book offers a comprehensive exploration of GIScience education including current trends and future educational needs in GIScience and will act as a resource to prepare learners for a world that demands more intensive investment in present day education and technological literacy Additionally the indirect benefit of merging the fragmented literature on GIScience literacy will provide a basis to examine common techniques and enable a new wave of research more rooted in learning theories In ten chapters the book is designed to attract an audience from geographic information systems science geomatics spatial information science cartography information technology and educational technology as focus disciplines

**The Geography of Names** Gwilym Lucas Eades, 2016-07-15 This book examines geographical names place names and toponymy from philosophical and cultural evolutionary perspectives Geographical name tracking networks Geo NTN's are posited as tools for tracking names through time and across space and for making sense of how names evolve both temporally and spatially Examples from North and South American indigenous groups the Canadian arctic Wales England and the Middle East are brought into a theoretical framework for making sense of aspects of place naming practices beliefs and systems New geographical tools such as geographic information systems GIS and global positioning systems GPS are demonstrated to be important in the production and maintenance of robust networks for keeping names and their associated meanings viable in a rapidly changing world where place naming is being taken up increasingly in social media and other new mapping platforms The Geography of Names makes the case that geographical names are transmitted memetically i.e. as cultural units or memes through what Saul Kripke called communication chains Combining insights from Kripke with views of later Wittgenstein on language and names as being inherently spatial the present work advances theories of both these thinkers into an explicitly geographical inquiry that advances philosophical and practical aspects of naming language and mapping

*Mission IAS - Prelim/ Main Exam, Trends, How to prepare, Strategies, Tips & Detailed Syllabus* Dr. Md. Usman Ansari, 2016-12-01 In today's highly competitive world with ever expanding boundaries of knowledge if you want to find a success mantra then it has to be know the right thing at the right time make right use of it in just the right words Everybody has his own bank of knowledge some have more than others but does it serve any purpose if you don't know how

*After Katrina* Anna Hartnell, 2017-01-25 Argues that post Katrina New Orleans is a key site for exploring competing narratives of American decline and renewal at the beginning of the twenty first century Through the lens provided by the tenth anniversary of Hurricane Katrina *After Katrina* argues that the city of New Orleans emerges as a key site for exploring competing narratives of US decline and renewal at

the beginning of the twenty first century Deploying an interdisciplinary approach to explore cultural representations of the post storm city Anna Hartnell suggests that New Orleans has been reimagined as a laboratory for a racialized neoliberalism and as such might be seen as a terminus of the American dream This US disaster zone has unveiled a network of social and environmental crises that demonstrate that prospects of social mobility have dwindled as environmental degradation and coastal erosion emerge as major threats not just to the quality of life but to the possibility of life in coastal communities across America and the world And yet After Katrina also suggests that New Orleans culture offers a way of thinking about the United States in terms that transcend the binary of national renewal or declension The post Hurricane city thus emerges as a flashpoint for reflecting on the contemporary United States *Locative Media* Rowan Wilken, Gerard

Goggin, 2014-08-07 Not only is locative media one of the fastest growing areas in digital technology but questions of location and location awareness are increasingly central to our contemporary engagements with online and mobile media and indeed media and culture generally This volume is a comprehensive account of the various location based technologies services applications and cultures as media with an aim to identify inventory explore and critique their cultural economic political social and policy dimensions internationally In particular the collection is organized around the perception that the growth of locative media gives rise to a number of crucial questions concerning the areas of culture economy and policy **Literary**

**Geographies** S. Hones, 2014-08-07 Combining literary analysis with a practical introduction to interdisciplinary literary geography Literary Geographies examines key elements of Colum McCann's 2009 novel Let the Great World Spin Hones examines concepts such as narrative space literary and academic collaboration and the geographies of creation production and reception **Cool** Steven Quartz, Anette Asp, 2015-04-14 This engrossing history merges evolutionary biology and economics to explain our spending habits and show how coolness is at the heart of consumerism Mental Floss We live in a

world of conspicuous consumption where the things we buy not only satisfy our needs but also communicate our values identities and aspirations In Cool Steven Quartz and Anette Asp bring together groundbreaking findings in neuroscience economics and evolutionary biology to show how our concepts of cool be it designer jeans smartphones or craft beer help drive the global economy Cool puts forth a provocative theory of consumerism based on our brain's innate status seeking and social calculator The authors highlight the underlying processes that guide our often unconscious decision making They also pull back the curtain on choice architects who design store interiors as well as coolhunters who scour Berlin and Tokyo for the latest trends Quartz and Asp follow the evolution of cool consumption from the mid twentieth century through the emergence of the Internet in the 1990s finally unpacking the social motivations behind today's hip ethical consumption Taking us from Norman Mailer to normcore Cool is surprising at every turn and will forever change the way you think about money status and your next purchase **Assessment in Geographical Education: An International Perspective**

Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance

of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

**A Research Agenda for Tourism Geographies** Dieter K. Müller, 2019 In recent years tourism geographies have developed into a vibrant field of research at the intersection of geography and tourism studies The book presents a unique collection of individual research agendas aiming to inspire the pursuit of new avenues of research Although there have been arguments to apply post disciplinary perspectives within tourism research this book highlights the interest and potential of tourism geographers to contribute to a geographical tradition and influence the future content of geography as a discipline

**Geographers** Elizabeth Baigent, André Reyes Novaes, 2019-12-26 Women are the exclusive focus of the 38th volume of Geographers For the first time in the series history the entire volume is devoted to important work of distinguished female geographers amply demonstrating how these scholars professional lives enrich the discipline s history It also illustrates how reading and writing their biographies not only expands our understanding of geography s past but points to its more diverse future The collection includes biographies of Doreen Massey winner of geography s Nobel prize the prix Vautrin Lud for her remarkable contribution to geography and neighbouring disciplines which discovered the importance of space through her work Helen Wallis geographer and historian of cartography who for many years had charge of the UK s foremost collection of maps Alice Saunier Se t who applied her geographical training and formidable energy to teaching and educational reform in France Isabel Margarida Andr who lived through a turbulent political period in her native Portugal and meticulously investigated its effect on women and political

geography and the many women who helped to create the UK's first Geography department the University of Oxford's School of Geography including Fanny Herbertson Nora MacMunn Marjorie Sweeting Mary Marshall Barbara Kennedy and other women geographers who are memorialised in a group article *The Business of Sustainable Tourism Development and Management* Susan L. Slocum, Abena Aidoo, 2020-03-31 The Business of Sustainable Tourism Development and Management provides a comprehensive introduction to sustainable tourism crucially combining both theoretical and practical approaches to equip students with the tools to successfully manage a sustainable tourism business or destination Covering a range of crucial topics such as mass tourism alternative tourism human capital management and many more this book incorporates a global curriculum that widens the sustainable tourism debate to include theoretical perspectives applied research best practice frameworks business tools and case studies facilitating a more comprehensive sustainable tourism educational strategy Information on how to effectively implement strategies that can be applied to business environments entrepreneurship and job skills to enhance career preparation is at the forefront of this textbook Highly illustrated and with an interactive companion website including bonus learning materials this is the ideal textbook for students of tourism hospitality and events management at both undergraduate and postgraduate levels *Lithofacies Paleogeography and Geological Survey of Shale Gas* Chuanlong Mou, Xiuping Wang, Qiyu Wang, Xiangying Ge, Bowen Zan, Kenken Zhou, Xiaowei Chen, Wei Liang, 2023-04-06 This is an open access book This book presents new theory and methods on compiling lithofacies paleogeographic maps as a key tool for guiding geological survey on shale gas The fundamental goal of the shale gas geological survey is to find the desert area It is therefore suggested that the lithofacies paleogeographic study and the technique of mapping should be a solid scientific basis for shale gas exploration It takes Ordovician Wufeng Silurian Longmaxi Formation in Sichuan Basin and its adjacent area as an example to illustrate how to find the desert area of shale gas in geological survey phase by compiling lithofacies paleogeographic map It's a valuable reference for both scientific research and teaching courses in the fields of sedimentary lithofacies paleogeography stratigraphy and oil and gas

As recognized, adventure as with ease as experience nearly lesson, amusement, as competently as accord can be gotten by just checking out a book **Paper One Geography Exemplar 2013** with it is not directly done, you could give a positive response even more on the order of this life, on the subject of the world.
