Paper Promises Money Debt And The New World Order:

Paper Promises Philip Coggan,2012-02-07 A columnist for the Economist describes the consequences of the enormous amounts of unrepayable debt racked up by the United States and discusses what it means for the financial future of the country and its citizens

Paper Promises Philip Coggan,2011 For the past forty years Western economies have splurged on debt Now as the reality dawns that many debts cannot be repaid we find ourselves again in crisis But the oncoming defaults have a time worn place in our economic history As with crises in the thirties and seventies governments will fall currencies will lose their value and new systems will emerge Just as Britain set the terms of the international system in the nineteenth century and America in the twentieth century a new system will be set by today's creditors in China and the Middle East In the process rich will be pitted against poor young against old public sector workers against taxpayers and one country against another To understand the origins of this mess and how it will affect the new global economy Coggan shows us how our attitudes toward debt have changed throughout history and how they may be about to change again

Rebel Douglas Carswell,2017-03-25 Politics has never been more unpredictable Radical populists and insurgents have turned politics as usual on its head Rebel explores how we got here where we are heading and what we can do about it Douglas Carswell argues that these insurgencies are a reaction against the emergence of a political and economic oligarchy that has subverted our democracy and stifled our market system Politics he writes is a cartel Like the economy it is rigged in the interests of a few This leaves our liberal democratic order the mechanism that has allowed a historically unprecedented proportion of humanity to flourish facing a twin assault oligarchs on the one hand radical populists on the other Reassessing history and politics Rebel puts forward a bold new thesis we are not the first to face such a threat Oligarchic cartels have clogged the arteries of nations and economies throughout history triggering radical insurgencies in protest But all too often the radicals have strengthened the hand of the oligarchs the Roman Venetian and Dutch republics all succumbed to cartels Anti oligarch radicals the author notes have often made the oligarchs seem the more attractive option So too today he suggests In the face of these twin threats Carswell mounts a robust defence of the liberal democratic order Drawing on his first hand experience in taking on and beating the established political parties he proposes a profound reform of politics and capitalism to free us from the cartels listing the practical steps needed to make this revolutionary change happen

Freedom's Progress? Gerard Casey,2021-10-04 In Freedom's Progress Gerard Casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom Such a transition is he argues neither automatic nor complete nor are relapses to tribalism impossible The reason for the fragility of freedom is simple the importance of individual freedom is simply not obvious to everyone Most people want security in this world not liberty Libertarians writes Max Eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the

extravagance of this opinion The herd instinct and the yearning for paternal authority are often as strong Indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history The charm of the collective exercises a perennial magnetic attraction for the human spirit In the 20th century Fascism Bolshevism and National Socialism were Casey argues each of them a return to tribalism in one form or another and many aspects of our current Western welfare states continue to embody tribalist impulses Thinkers you would expect to feature in a history of political thought feature in this book Plato Aristotle Machiavelli Locke Mill and Marx but you will also find thinkers treated in Freedom's Progress who don't usually show up in standard accounts Johannes Althusius Immanuel Kant William Godwin Max Stirner Joseph Proudhon Mikhail Bakunin Pyotr Kropotkin Josiah Warren Benjamin Tucker and Auberon Herbert Freedom's Progress also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery Christianity the universities cities Feudalism law kingship the Reformation the English Revolution and what Casey calls Twentieth Century Tribalisms Bolshevism Fascism and National Socialism and an extensive chapter on human prehistory

Credo Credit Crisis Aidan Tynan, Laurent Milesi, Christopher John Müller, 2017-08-25 Money facilitates the rites and rituals we perform in everyday life More than a mere medium of exchange or a measure of value it is the primary means by which we manifest a faith unique to our secular age But what happens when individual belief credo I believe and the systems into which it is bound credit it believes enter into crisis Where did the sacredness of money come from and does it have a future Why do we talk about debt and repayment in overtly moral terms How should a theological critique of capitalism proceed today With the effects of the 2008 economic crises continuing to be felt across the world this volume brings together some of the most important contemporary voices in philosophy literature theology and critical and cultural theory together in one volume to assert the need to interrogate and broaden the terms of the theological critique of capitalism

Dollars, Polity and Law George M. Hall, 2014-07-24 Revamping the Political Economy after the Impending Collapse No country can borrow indefinitely without fatal consequences But that is

just what the United States is doing adding nearly a trillion dollars annually to its already massive debt as overseen by a Congress with an approval rating in the 10 to 14 percent range In the process the mind set that spawned the sub prime mortgage now renders the entire economy sub prime This book explains why and how resolution might obtain after the collapse The essence is termed polity economics given that the bifurcated concepts of capitalism and socialism have lost their utility yet persist as incompatible political touchstones This perspective includes some twenty explicit elements all addressed at length Yet by itself it too will also eventually fail For it is also essential to restate the Constitution so that it becomes efficaciously aligned with the evolved culture and ethic of the United States especially to instill stability within the fiscal operations that have come to dominate the country The ABC s of that admittedly profound document simply do not address the D through Z s that have devolved over more than two centuries Excerpts On fiscal carrying capacity Isn t the United States simply too big to fail History laughs Every empire and nation has been laid waste when it continuously reached for more than it could grasp which leads to the primary argument in this book Every economy has a substantive need for just so much money and fungible assets a carrying capacity so to speak When that capacity is exceeded money becomes a commodity in its own right Given propensities to accumulate money and inflate values over a bread and butter baseline the economy degenerates in three successive tiers The first tier harbors the inevitable dis tensions of economics such as periodic business cycles and recessions Yet money remains a tool not the essence But if recessions are avoided money begins to compete with the substantive aspects of an economy This is the second tier where leveraged val ues inherently devolve unstable followed eventually by a depression Yet even de pres sion can be staved off by massive bailouts and unsustainable debt This is the third tier Money takes pri or ity over substance until that is the economy collapses On political versus supposed economic rights There may be free speech there is no free lunch

The End of the Eurocrats' Dream Damian Chalmers,Markus Jachtenfuchs,Christian Joerges,2016-03-18 This volume argues that the crisis of the European Union is not merely a fiscal crisis but reveals and amplifies deeper flaws in the structure of the EU itself It is a multidimensional crisis of the economic legal and political cornerstones of European integration and marks the end of the technocratic mode of integration which has been dominant since the 1950s The EU has a weak political and administrative centre relies excessively on governance by law is challenged by increasing heterogeneity and displays increasingly interlocked levels of government During the crisis it has become more and more asymmetrical and has intervened massively in domestic economic and legal systems A team of economists lawyers philosophers and political scientists analyze these deeper dimensions of the European crisis from a broader theoretical perspective with a view towards contributing to a better understanding and shaping the trajectory of the EU

Capitalism John Plender,2015-07-28 Capitalism has lifted millions out of poverty Under its guiding hand living standards throughout the Western world have been transformed Further afield the trail blazed by Japan is being followed by other emerging market countries across the globe creating prosperity on a breathtaking scale And

yet capitalism is unloved From its discontents to its outright enemies voices compete to point out the flaws in the system that allow increasingly powerful elites to grab an ever larger share of our collective wealth In this incisive clear sighted guide award winning Financial Times journalist John Plender explores the paradoxes and pitfalls inherent in this extraordinarily dynamic mechanism and in our attitudes to it Taking us on a journey from the Venetian merchants of the Renaissance to the gleaming temples of commerce in 21st century Canary Wharf via the South Sea Bubble Dutch tulip mania and manic depressive gambling addicts Plender shows us our economic creation through the eyes of philosophers novelists poets artists and divines Along the way he delves into the ethics of debt reveals the truth about the unashamedly materialistic artistic giants who pioneered copyrighting and traces the path of our instinctive conviction that entrepreneurs are greedy unethical opportunists hell bent on capital accumulation while manufacturing is innately virtuous Thoughtful eloquent and above all compelling Capitalism is a remarkable contribution to the enduring debate

US-China Relations in the Twenty-First Century Michael Tai, 2015-04-24 The relationship between the United States and China will be of critical importance to the world throughout the twenty first century In the West China s rise is often portrayed as a threat and China seen in negative terms This book explores the dynamics of this crucial relationship It looks in particular at what causes an international relationship to be perceived negatively and considers what can be done to reverse this arguing that trust is a key factor It goes on to discuss US and Chinese rhetoric and behaviour in three key areas climate change finance and international security The book contends that contrary to much US rhetoric China s actions in these areas is often much more flexible and accommodating than the US position and that the Chinese are much more knowledgeable about and understanding and appreciative of the United States than vice versa

The Politics of Financial Risk, Audit and Regulation Atul Shah, 2017-08-08 The biggest corporate failure ever in British history occurred in 2008 with very little forewarning The management of HBOS a major national bank with a long history of prudence prior to the merger in 2001 were allowed to act incompetently Auditors and regulators failed to act ignoring a key senior whistleblower and the competitive stock market failed to spot management failure in time This book is the first academic study of this collapse uncovering some surprising evidence on the power and politics of large financial institutions It details the processes and degrees to which financial challenge and regulation are undermined by this power The research exposes a pro active process of regulatory risk management by these institutions the ease with which auditors and regulators can be captured and how politicians and investors can be all too happy to hop on the stock market and management spin ride with other people s money The study questions the ideology and politics which supported and encouraged the management hubris raising profound questions about the politics of the academic disciplines of banking finance and accounting today and the theories they underpin This account of management gone wrong is essential reading for students researchers and professionals involved in banking finance credit infrastructure economics and management studies
