The Opportunity Equation Eric

Schwarz,2014-09-02 Schwarz founder of the groundbreaking Citizen Schools program shares his vision for reducing inequality by pairing successful adults with low income students Parental wealth now predicts adult success more than at any point in the last hundred years And yet as debates about education rage on and wealth based achievement gaps grow too

many people fix the blame on one of two convenient scapegoats poverty or our public schools But in fact low income kids are learning more now than ever before The real culprit for rising inequality Eric Schwarz argues in *The Opportunity Equation* is that wealthier kids are learning much much more mostly outside of school In summer camps robotics competitions sessions with private tutors and conversations around the dinner table children from more affluent families build the skills and social networks that propel them to success In *The Opportunity Equation* Schwarz tells the story of how he founded the pioneering Citizen Schools program to combat rising inequality by bringing these same opportunities to children who don t have access to them By increasing learning time in schools and harnessing the power of an army of volunteers with various skills and professional backgrounds lawyers engineers carpenters journalists nonprofit leaders and grandmothers who sew Citizen Schools offers after school apprenticeships that provide the building blocks for adult success Recounting the triumphs and setbacks he s encountered in implementing the program Schwarz shows that some of the nation s lowest performing schools in its lowest income cities can with help provide their students with many of the same experiences wealthy communities afford to their children The results have been proven in the dozen school districts from New York to Oakland that have partnered with Citizen Schools rates of attendance proficiency graduation and college acceptance have gone up and the achievement gap closes At a time when many stakeholders in the education debates are looking for new silver bullet shortcuts to educational excellence Schwarz shows that the best solution is human centered rooted in the American tradition of citizen voluntarism and most important achievable We can provide quality education for all students and close the opportunity gap in this country and we can do it together **Nelson Goodman** Daniel Cohnitz, Marcus Rossberg, 2014-12-18

Nelson Goodman s acceptance and critique of certain methods and tenets of positivism his defence of nominalism and phenomenalism his formulation of a new riddle of induction his work on notational systems and his analysis of the arts place him at the forefront of the history and development of American philosophy in the twentieth century However outside of America Goodman has been a rather neglected figure In this first book length introduction to his work Cohnitz and Rossberg assess Goodman s lasting contribution to philosophy and show that although some of his views may be now considered unfashionable or unorthodox there is much in Goodman s work that is of significance today The book begins with the grue paradox which exemplifies Goodman s way of dealing with philosophical problems After this the unifying features of Goodman s philosophy are presented his constructivism conventionalism and relativism followed by an discussion of his central work *The Structure of Appearance* and its significance in the analytic tradition The following chapters present the technical apparatus that underlies his philosophy his mereology and semiotics which provides the background for discussion of Goodman s aesthetics The final chapter examines in greater depth the presuppositions underlying his philosophy
