**Decision-Making Experiments under a Philosophical Analysis: Human Choice as a Challenge for Neuroscience** Gabriel José Corrêa Mograbi, Carlos Eduardo Batista de Sousa, 2015-10-15 This introduction just aims to be a fast foreword to the special topic now turned into an e book The Editorial Decision Making Experiments under a Philosophical Analysis Human Choice as a Challenge for Neuroscience alongside with my opinion article Neurophilosophical considerations on decision making Pushing up the frontiers without disregarding their foundations play the real role of considering in more details the articles and the whole purpose of this e book What I must highlight in this foreword is that our intention with such a project was to deepen into the very foundations of our current paradigms in decision neuroscience and to philosophically moot its foundations and repercussions Normal Science a term coined by Philosopher Thomas Kuhn works under a research consensus among a

scientific community A shared paradigm consolidated methods widespread convictions Pragmatically winning formulas must be kept although not at any cost What differentiates a gifted and revolutionary scientist from a more bureaucratic colleague is the capacity and willingness of constantly reevaluating depurating and refining his her own paradigm That is best strategy to avoid that a paradigm itself would gradually come under challenge In my view some achievements in this sense were brought about in our project The e book will be inspiring and informative for both neuroscientists that are concerned with the very foundations of their works and for philosophers that are not blind to empirical evidence Kant once said Thoughts without content are empty intuitions without concepts are blind Paraphrasing Kant we could say Philosophy without science is empty science without philosophy is blind Xenophon's Virtues Gabriel Danzig,David M. Johnson,David

Konstan,2024-07-22 While Plato s and Aristotle s theories of virtue have received extensive scholarly attention less work has been done on Xenophon s portraits of virtue and on his attitude towards the theoretical issues connected with it And yet Xenophon offers one of the best sources we have for thinking about virtue in ancient Greece because he combines the analytical interests of a Socratic with a historian s interest in real life Until recently scholars of Xenophon tended to focus either on the historiographical writings or on the philosophical writings chiefly Memorabilia with some attention to the other Socratic writings and Hiero Cyropaedia was treated as a separate entity and Xenophon s short and more technical treatises were generally studied only by those with particular interest in their specialized topics such as horsemanship hunting and Athenian finances But recent work by Vincent Azoulay and by Vivienne Gray have shown the essential unity of his writings This volume continues this pan Xenophonic trend by studying the virtues across Xenophon s oeuvre and connecting them with a wide range of Greek literature from Homer and the tragedians to Herodotus and Thucydides the orators Plato and Aristotle Understanding the Processes Associated with Forgiveness Haijiang Li,Everett L.
