Dear Van:

Just a word in explanation of my telephone call this afternoon in regard to the #92 project.

I was well impressed by Dr. Briggs' presentation two weeks ago and it looks as if the project were going ahead with some probability of success. However, there are some aspects of the situation which are disquieting. One of them is that our English friends are apparently farther ahead than we are, despite the fact that we have the most in number and the best in quality of the nuclear physicists of the world. A second disquieting element is the fact that we have reason to believe that the Germans are very active. A third feature is the fact that only a very few of our own nuclear physicists are being put to work on the project and even those who are working on it are decidedly restive over such situations as the following.

The committee practically never meets. The conduct of the business is extremely slow. For example, a considerable time after one of our most prominent physical chemists had been selected to work with another physical chemist on one of the most promising and active aspects of the problem, he had as yet received no appointment or information about the plans. Furthermore, the work has been conducted in such secrecy that even members within the working organization do not appear to know and to get authorization to find out about what is being done in closely related lines which should influence their activities. Still another source of complaint is that some of the most interesting lines of development and use have received so little attention that any possible application in the present emergency is being so far removed as to be practically unavailable.

Ernest Lawrence, in his numerous contacts with nuclear physicists and chemists, has, on the other hand, become quite
