

Cyber Bullying in the Internet

Cyber-bullying is a form of bullying or harassment using electronics means. It has become gradually more common, especially among young people nowadays. Cyber-bullying is when someone bully or harass others through social media sites. Today, young people and even the adults are using the internet. The internet and mobile phones systems are the two biggest systems of communication which plays a crucial role in our daily activities and development of identities.

Cyberbullies do cyber-bullying because they can't do it in person so certainly they do it online. Having also insecurities to a specific person could result to cyber-bullying because if he/she can't have what that person has he/she will definitely bully that person through the use of social media.

For example, seeing a scandal and asking for link, then after watching it, immediately post something bad about the persons who are involved in the scandal because they can see that people is happy and liking the idea of posting bad contents about the persons in the scandal. According also to the research, there are two types of bully, first the popular ones a
