
STATEMENT OF TEACHING PHILOSOPHY

A major component of my professional practice includes information literacy instruction – whether it is delivered through formal or informal means, in the classroom or online, or as part of conversations with faculty about how to integrate IL into their own teaching. In this context of teaching and learning, I attempt to integrate, and reflect, the following values:

Information literacy is an academic literacy. Information literacy is part of a broader system of academic literacies – student learning does not start and stop with library resources. The development of information literacy requires librarians to recognise the interconnectedness of information literacy with related learning around academic reading and writing, critical thinking skills, and digital literacies. This relationship must also be reflected in our approach to teaching. In my teaching, I approach research as process that is iterative, organic, messy, and requiring a variety of interdisciplinary skills, like effective academic reading skills, critical thinking around how information is organised in order to access it effectively, effective writing skills, digital literacy, and understanding academic conventions like citation and academic language.

Striking a balance between bibliographic instruction and critical information literacy. Students need bibliographic instruction to undertake their assignments. Knowing how to use specific tools, key library procedures, and the mechanics of finding research materials is part of building effective research skills. However this must be balanced with critical understandings of how information is produced and organised, and how to use information in an empowering, participatory way. By speaking to larger, more complex issues beyond “point and click” instruction, I believe librarians can help students develop the agency to engage in discussions and critical assessments around how knowledge is produced, and to become participatory creators of the production of new knowledge.

Using online learning effectively. Leveraging web-based tools like screencasting technologies, learning management systems or LibGuides, help students learn research skills in a mode that is at their point of need (online), asynchronously (anytime, anywhere) and in a scalable medium (any number of students, any number of times). Well-designed eLearning tools that integrate multimodal learning, flexible learning paths, or interactivity, can greatly enhance student learning beyond the classroom, particularly in the areas of skills-based learning. And as distance education programs proliferate, eLearning tools are critical to ensuring that virtual classrooms are effectively supported by the library. I am committed to understanding principles of instructional design, usability, and online learning to help enhance student learning in the virtual environment.

Engage students. As the gamification movement has illustrated, engagement is critical to placing students at the centre of the teaching process and ensures more effective learning. To this end, I like to be personable, funny, and dynamic, to help students feel comfortable in the class. I integrate tools of active learning, ranging from eLearning technologies to in-class group work to create a learning experience that is dynamic and memorable. These methods allow students to interact with the course content and pursue inquiry of their research topics in an open and authentic way. They work both collaboratively and independently to develop skills in synthesis of research questions, critical assessment of information sources, effective search strategies, and other aspects of information literacy.

Continually assess teaching. Assessment and evaluation are essential for an instructor’s on-going professional development. I employ in-class assessment throughout sessions to identify potential gaps between what is being taught and what students have learned. I also integrate assessment into eLearning tools to ensure students are on track. Evaluations from students provide critical feedback that allows me to reflect on ways to improve my teaching methodologies. They afford key insights from students that help me better execute student-centred instruction that provides appropriate challenges in the classroom.

Papers Philosophy Of Teaching Introduction

In the digital age, access to information has become easier than ever before. The ability to download Papers Philosophy Of Teaching has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Papers Philosophy Of Teaching has opened up a world of possibilities. Downloading Papers Philosophy Of Teaching provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Papers Philosophy Of Teaching has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Papers Philosophy Of Teaching. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Papers Philosophy Of Teaching. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Papers Philosophy Of Teaching, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Papers Philosophy Of Teaching has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of

continuous learning and intellectual growth.
