Mathematical Methods for Signal and Image Analysis and Representation Luc Florack, Remco Duits, Geurt Jongbloed, Marie-Colette van Lieshout, Laurie Davies, 2012-01-12 Mathematical Methods for Signal and Image Analysis and Representation presents the mathematical methodology for generic image analysis tasks In the context of this book an image may be any  $m$  dimensional empirical signal living on an  $n$  dimensional smooth manifold typically but not necessarily a subset of spacetime The existing literature on image methodology is rather scattered and often limited to either a deterministic or a statistical point of view In contrast this book brings together these seemingly different points of view in order to stress their conceptual relations and formal analogies Furthermore it does not focus on specific applications although some are detailed for the sake of illustration but on the methodological frameworks on which such applications are built making it an ideal

companion for those seeking a rigorous methodological basis for specific algorithms as well as for those interested in the fundamental methodology per se Covering many topics at the forefront of current research including anisotropic diffusion filtering of tensor fields this book will be of particular interest to graduate and postgraduate students and researchers in the fields of computer vision medical imaging and visual perception **Pixelization Paradigm** Pierre P Lévy, Bénédicte Le Grand, François Poulet, Michel Soto, Laszlo Darago, Laurent Toubiana, Jean-Francois Vibert, 2007-05-19 This book constitutes the thoroughly refereed post proceedings of the Visual Information Expert Workshop VIEW 2006 held in Paris France in April 2006 The 23 revised full papers were carefully selected from numerous submissions during two rounds of reviewing and improvement The book is categorized in three main parts pixelization theory pixelization applications pixelization and cognition **Fun with Algorithms** Paolo Boldi, Luisa Gargano, 2010-05-20 This book constitutes the proceedings of the 5th International Conference FUN 2010 held in June 2010 in Ischia Italy FUN with algorithms is a three yearly conference that aims at attracting works which besides a deep and interesting algorithmic content also present amusing and fun aspects The 32 full papers and 3 invited talks are carefully selected from 54 submissions and focus on topics such as distributed algorithms graph computations parallelism zero knowledge proof iphone pattern matching and strategy games **Image and Video Technology** Reinhard Klette, Mariano Rivera, Shin'ichi Satoh, 2014-01-31 This book constitutes the thoroughly refereed post conference proceedings of the 6th Pacific Rim Symposium on Image and Video Technology PSIVT 2013 held in Guanajuato Mexico in October November 2013 The total of 43 revised papers was carefully reviewed and selected from 90 submissions The papers are organized in topical sections on image video processing and analysis image video retrieval and scene understanding applications of image and video technology biomedical image processing and analysis biometrics and image forensics computational photography and arts computer and robot vision pattern recognition and video surveillance **Boating**, 1997-01 **Artificial Intelligence and Applied Mathematics in Engineering Problems** D. **Image and Video Retrieval** Wee-Kheng Leow, Michael S. Lew, Tat-Seng Chua, Wei-Ying Ma, Lekha Chaisorn, Erwin M. Bakker, 2007-05-22

It was our great pleasure to host the 4th International Conference on Image and Video Retrieval CIVR at the National University of Singapore on 20-22 July 2005. CIVR aims to provide an international forum for the discussion of research challenges and exchange of ideas among researchers and practitioners in image/video retrieval technologies. It addresses innovative research in the broad field of image and video retrieval. A unique feature of this conference is the high level of participation by researchers from both academia and industry. Another unique feature of CIVR this year was in its format: it offered both the traditional oral presentation sessions as well as the short presentation cum poster sessions. The latter provided an informal alternative forum for animated discussions and exchanges of ideas among the participants. We are pleased to note that interest in CIVR has grown over the years. The number of submissions has steadily increased from 82 in 2002 to 119 in 2003 and 125 in 2004. This year we received 128 submissions from the international communities with 81 (63.3%) from Asia and Australia, 25 (19.5%) from Europe, and 22 (17.2%) from North America. After a rigorous review process, 20 papers were accepted for oral presentations and 42 papers were accepted for poster presentations. In addition to the accepted submitted papers, the program also included 4 invited papers: 1 keynote industrial paper and 4 invited industrial papers. Altogether we offered a diverse and interesting program addressing the current interests and future trends in this area.
