Each chapter ends with increasingly advanced topics such as installation and configuration of the administrative back end, using 3rd party extensions to create a portfolio, a blog, an e-commerce site, magazine or news portal, as well as how to use content construction kits, create custom templates and integrate social media. New features covered in this edition include how to use the redesigned admin interface, new menu systems including advanced functions for developers, how to use the category/article structure of content, the ability for users to create their own groups and assign access control levels, and control and customization of templates.
