materials Jim has a vision that within the next couple of decades world agriculture will be radically transformed by the  
advent of cultivated meat technology This book grounds the reader in why such an advancement is absolutely necessary and  
informs them of the investments they could make to become part of the New Agricultural Revolution themselves The  
harrowing effects on our environment animal cruelty in food and fashion and the struggling ability to feed the world s ever  
growing population gives us no choice but to grow meat in labs or derive our proteins from plant based sources Not only this  
he outlines what he sees as the major hurdles to the industry s success in terms of scalability of production and the smart
