Ovarian Cancer Targeted Medication: PARP Inhibitors, Anti-Angiogenic Drugs, Immunotherapy, and More, volume II Zhaoqian Liu,Jing Wang,Naiyuan Wu,Guang Lei, Zhi-Bin Wang,2025-02-21 Ovarian cancer is the malignancy with the highest rate of death from tumors of the female reproductive system and the main treatment options are tumor reduction and post surgical platinum based chemotherapy Unfortunately some patients will develop platinum resistance after multiple recurrences Given that ovarian cancer is a heterogeneous disease with complex molecular and genetic alterations the identification of specific molecular targets will be of great benefit in gaining a deeper understanding of the mechanisms of ovarian cancer development and progression As research into targeted therapies continues the treatment of ovarian cancer is gradually shifting from conventional chemotherapy to targeted therapies Targeted drugs such as PARP inhibitors and anti angiogenic drugs have become important modalities for the maintenance treatment of ovarian cancer At the same time targeted therapy also suffers from ineffective use high rates of adverse reactions and high prices With the development of next generation sequencing technology targeted therapeutic agents developed for specific molecules in ovarian cancer may provide a wider range of treatment options for ovarian cancer patients and offer new strategies for individualized treatment Immunotherapy as well as ferroptosis pathway modulation has also provided new ideas for targeted therapy in ovarian cancer

Research Outlook,Innovations & Research Trends in Science & Technology Prof S S Rajput,Prof Dr Zeliha Selamoglu,Dr Prashant P Chaudhari, Mrs Priyanka Gupta,2020-10-25 This book is focused predominantly on academicians research

scholars belong to science and engineering managers scientists technicians and other professionals in the field of qualitative research This book is comprehended from different sources of research in Science and Technology On the first occasion the task of providing researchers with a broad view of the relationship between science and technology The second reason for writing the book was the need to fill a gap in academics and research While many excellent books documents and article exist for innovative practices we have not found a work in which we can properly understand the content that the researcher needs to understand So after much deliberation we decided to collect all quality efforts in one string At the most basic level this book is trying to show research scholars what science technology and innovations are all about It cannot study or gain knowledge of that part and is at a level that most researchers should find clear and understandable Our goal was to develop content that will help researchers who are beginning to use innovative practices We hope to meet the needs of academicians research scholars who are being encouraged to incorporate more reading and writing in the field of science and technology In summary this book is targeted to the needs of individuals engaged in quality research activities in science and technology Our goal is to present the topics of creativity and innovation to this audience in a way that enables them to incorporate new skills into their daily work We would like to thank all the contributors who have made the production of this book so fascinating and enjoyable Their scholarship and dedicated commitment and motivation to getting it right are the keys to the book s quality and we greatly appreciate their good nature over many months in the face of our editorial demands and time limits We are also grateful for using their texts ideas and critical remarks We would also like to thank Prof Dr Nilam N Ghuge Prof Dr D Ayub Khan Dawood Prof Dr Vilas A Pharande all reviewers and all authors for their help in consolidating the interdisciplinary of the book We are grateful to all the 18 institutions for their support It will not be possible to bring out this edition

**Combinational Immunotherapy of Cancer: Novel Targets, Mechanisms, and Strategies** Xuyao Zhang,Xian Zeng,Yubin Li,Dianwen Ju,2024-01-15 Cancer immunotherapy including immune checkpoint inhibitors ICIs and chimeric antigen receptor T cell CAR T therapy has revolutionized the paradigm in cancer treatment However the clinical outcome of immunotherapy varies considerably among patients and only a minority of patients achieve long term clinical benefits This is largely attributed to the fact that existing cancer immunotherapies which concentrate on several classical targets CTLA 4 PD 1 PD L1 etc and limited types of immune cell populations T cells are insufficient to cope with the complexity of highly heterogeneous tumor microenvironment TME This calls for more efforts to not only expand our toolbox for manipulating anticancer immunity but also diversify our combinational strategies To this end it is urgent to deeper our understanding of cancer immunotherapy by using both experimental and computational methodologies from multi scale perspectives 1 novel targets from either tumor cells or non tumor cells within TME e g tumor intrinsic resistance drivers new immune checkpoints neoantigens 2 in depth characterization of more immune cell populations e g macrophages Tregs B cells and their interactions and dynamics within TME 3 landscape of actionable targets in patient populations for combination design These

efforts will open the avenue of rational design of combinational immunotherapies allowing researchers and clinicians to design novel targeting therapeutics or to optimally orchestrate combinatory strategies aiming to surmount resistance mechanisms and improve clinical outcomes     The Chemical News and Journal of Industrial Science ,1926     Photo-Driven Seawater Splitting for Hydrogen Production Xiao-Yu Yang,2023-04-29 This book presents photo driven seawater splitting technologies for hydrogen production This technology is considered as a win win interplay for both the utilization of solar energy as the most renewable energy and seawater as the most hydrogen source The book also discusses topics from raw materials selection characterization and mechanistic insights to the latest research developments in response to the need for environmentally friendly and low carbon industries In addition it provides insights into a most attractive energy conversion and storage cascade by combining solar energy and a hydrogen system Given its scope this book appeals to a broad readership particularly professionals at universities and scientific research institutes as well as practitioners in industry
