## **Weather Architecture Jonathan Hill:**

*Weather Architecture* Jonathan Hill, 2013-06-17 *Weather Architecture* further extends Jonathan Hill's investigation of authorship by recognising the creativity of the weather. At a time when environmental awareness is of growing relevance, the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design, construction and use in a creative dialogue with other authors such as the architect and user. Environmental discussions in architecture tend to focus on the practical or the poetic, but here they are considered together. Rather than investigate architecture's relations to the weather in isolation, they are integrated into a wider discussion of cultural and social influences on architecture. The analysis of weather's effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts, sciences and society, leading to a critical re-evaluation of contemporary responses to climate change. Jonathan Hill, 2019-03-25 *The Architecture of Ruins: Designs on the Past, Present and Future* identifies an alternative and significant history of architecture from the sixteenth century to the twenty-first century in which a building is designed, occupied and imagined as a ruin. This design practice conceives a monument and a ruin as creative, interdependent and simultaneous themes within a single building, dialectic, addressing temporal and environmental questions in poetic, psychological and practical terms, and stimulating questions of personal and national identity, nature and culture, weather and climate, permanence and impermanence, and life and death. Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past, the present and the future in a single architecture. Structured around a collection of biographies, this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society. Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones, the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design. Like a history, a design is a reinterpretation of the past that is meaningful to the present. Equally, a design is equivalent to a fiction, convincing users to suspend disbelief. We expect a history or a novel to be written in words, but they can also be delineated in drawing, cast in concrete or seeded in soil. The architect is a physical novelist as well as a physical historian. Like building sites, ruins are full of potential. In revealing not only what is lost but also what is incomplete, a ruin suggests the future as well as the past. As a stimulus to the imagination, a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity, indicating that a building can remain unfinished, literally and in the imagination, focusing attention on the creativity of users as well as architects. Emphasising the symbiotic relations between nature and culture, a building designed, occupied and imagined as a ruin acknowledges the coproduction of multiple authors, whether human, non-human or atmospheric, and is an appropriate model for architecture in an era of increasing climate change. **A Landscape of Architecture, History**

**and Fiction** Jonathan Hill, 2015-12-22 Architecture can be analogous to a history a fiction and a landscape We expect a history or a novel to be written in words but they can also be cast in concrete or seeded in soil The catalyst to this tradition was the simultaneous and interdependent emergence in the eighteenth century of new art forms the picturesque landscape the analytical history and the English novel Each of them instigated a creative and questioning response to empiricism a detailed investigation of subjective experience and the natural world and together they stimulated a design practice and lyrical environmentalism that profoundly influenced subsequent centuries Associating the changing natural world with journeys in self understanding and the design process with a visual and spatial autobiography this book describes journeys between London and the North Sea in successive centuries analysing an enduring and evolving tradition from the picturesque and romanticism to modernism Creative architects have often looked to the past to understand the present and imagine the future Twenty first century architects need to appreciate the shock of the old as well as the shock of the new

*Immaterial Architecture* Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill's explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice

Actions of Architecture Jonathan Hill, 2003-09-02 Drawing on the work of a wide range of architects artists and writers this book considers the relations between the architect and the user which it compares to the relations between the artist and viewer and the author and reader The book's thesis is informed by the text *The Death of the Author* in which Roland Barthes argues for a writer aware of the creativity of the reader *Actions of Architecture* begins with a critique of strategies that define the user as passive and predictable such as contemplation and functionalism Subsequently it considers how an awareness of user creativity informs architecture architects and concepts of authorship in architectural design Identifying strategies that recognize user creativity such as appropriation collaboration disjunction DIY montage polyvalence and uselessness *Actions of Architecture* states that the creative user should be the central concern of architectural design

*Women, Modernity, and Landscape Architecture* Sonja DümpeImann, John Beardsley, 2015-02-11 Modernity was critically important to the formation and evolution of landscape architecture yet its histories in the discipline are still being written This book looks closely at the work and influences of some of the least

studied figures of the era established and less well known female landscape architects who pursued modernist ideals in their designs. The women discussed in this volume belong to the pioneering first two generations of professional landscape architects and were outstanding in the field. They not only developed notable practices but some also became leaders in landscape architectural education as the first professors in the discipline or prolific lecturers and authors. As early professionals who navigated the world of a male dominated intellectual and menial work force they were exponents of modernity. In addition many personalities discussed in this volume were either figures of transition between tradition and modernism like Silvia Crowe, Maria Teresa Parpagliolo or they fully embraced and furthered the modernist agenda like Rosa Kriass, Cornelia Oberlander. The chapters offer new perspectives and contribute to the development of a more balanced and integrated landscape architectural historiography of the twentieth century. Contributions come from practitioners and academics who discuss women based in USA, Canada, Brazil, New Zealand, South Africa, the former USSR, Sweden, Britain, Germany, Austria, France, and Italy. Ideal reading for those studying landscape history, women's studies, and cultural geography.

**NATØ: Narrative Architecture in Postmodern London** Claire Jamieson, 2017-01-20. Chronicling the last radical architectural group of the twentieth century, NAT (Narrative Architecture Today) who emerged from the Architectural Association at the start of the 1980s, this book explores the group's work which echoed a wider artistic and literary culture that drew on the specific political, social, and physical condition of 1980s London. It traces NAT's identification with a particular stream of post-punk/postmodern expression, a celebration of the abject, an aesthetic of entropy, and a do-it-yourself provisionality. NAT has most often been documented in reference to Nigel Coates, the instigator of NAT, which has led to a one-sided, one-dimensional record of NAT's place in architectural history. This book sets out a more detailed contextual history of NAT, told through photographs, drawings, and ephemera, restoring a truer, polyvocal narrative of the group's ethos and development.

**The SAGE Handbook of Architectural Theory** C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-20. Offers an intense scholarly experience in its comprehensiveness, its variety of voices, and its formal organization. The editors took a risk, experimented, and have delivered a much needed resource that upends the status quo. Architectural Histories, journal of the European Architectural History Network, Architectural theory interweaves interdisciplinary understandings with different practices, intentions, and ways of knowing. This handbook provides a lucid and comprehensive introduction to this challenging and shifting terrain and will be of great interest to students, academics, and practitioners alike. Professor Iain Borden, UCL Bartlett School of Architecture. In this collection, architectural theory expands outward to interact with adjacent discourses such as sustainability, conservation, spatial practices, virtual technologies, and more. We have in The Handbook of Architectural Theory an example of the extreme generosity of architectural theory. It is a volume that designers and scholars of many stripes will welcome. K. Michael Hays, Eliot Noyes, Professor of Architectural Theory, Harvard University. The SAGE Handbook of Architectural Theory documents and builds upon the most innovative developments in architectural theory over

the last two decades Bringing into dialogue a range of geographically institutionally and historically competing positions it examines and explores parallel debates in related fields The book is divided into eight sections Power Difference Embodiment Aesthetics Pleasure Excess Nation World Spectacle History Memory Tradition Design Production Practice Science Technology Virtuality Nature Ecology Sustainability City Metropolis Territory Creating openings for future lines of inquiry and establishing the basis for new directions for education research and practice the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory

**Thermodynamic Interactions** Javier Garcia-German, 2017-07-01 An Exploration into Material Physiological and Territorial Atmospheres Energy and sustainability is a complex topic that needs to address simultaneously core disciplinary values and ideas that come from other fields of knowledge The interconnection between the environment and its climate its built structures and the human body requires overlying architecture with other disciplines such as meteorology thermodynamics or physiology to engage them in a holistic way The book is structured in three blocks Territorial Atmospheres Material Atmospheres and Physiological Atmospheres which present three distinct and successive realms at which thermodynamic exchanges are taking place Territorial Atmospheres deals with the thermodynamic interaction between the environment and its built structures Material Atmospheres focuses on the interaction between a building and the climate it generates And lastly Physiological Atmospheres centers on the interaction between indoor ambient and the physiological and psychological effects on human beings Each of the blocks has a coeditor Silvia Benedito for Territorial Atmospheres Iaki Balos for Material Atmospheres and Philippe Rahm for Physiological Atmospheres who will work together with the editor defining the context of the book

**An Accidental Masterpiece** Dietrich Neumann, 2020-12-07 The Complex History of a Building With the temporary exhibition pavilion of the German Reich at the 1929 International Exposition in Barcelona Mies van der Rohe designed an architectural icon but also a controversial monument of the way the Weimar Republic portrayed itself The building is one of the most unusual success stories in the history of architecture Despite its short existence its reputation grew steadily in the following decades thanks in part to magnificent photographs It was soon considered the constructed manifesto of the Modern Age and its spatial and ideational ambitions were called a milestone of Modern architecture This comprehensively broadly researched book portrays the building's complex history and its political entanglement up to and including its reconstruction according to van der Rohe's plans at the original site between 1983 and 1986 Presumably the most important and influential architectural icon of the 20th century uniquely documented and depicted On the occasion of the 50th anniversary of Mies' death and the Bauhaus centenary Many never before published photographs from archives in the US Germany and Spain

**Drifting - Architecture and Migrancy** Stephen Cairns, 2003-11-27 This book is an exploration of the often complex and unorthodox modes of dwelling that are emerging precisely from within the ruins of the idea of place

**Reading Architecture and Culture** Adam Sharr, 2012

Architecture displays the values involved in its inhabitation construction procurement and design It traces the thinking of the individuals who have participated in it their relationships and their involvement in the cultures where they lived and worked In this way buildings their details and the documents used to make them can be read closely for cultural insights Introducing the idea of reading buildings as cultural artefacts this book presents perceptive readings by eminent writers which demonstrate the power of this approach The chapters show that close readings of architecture and its materials can test commonplace assumptions help architects to appreciate the contexts in which they work and indicate ways to think more astutely about design The readings collected in this innovative and accessible book address buildings specifications and photographs They range in time from the fifteenth century examining the only surviving drawing made by Leon Battista Alberti to the recent past projects completed by Norman Foster in 2006 and Herzog and De Meuron in 2008 They range geographically from France to Puerto Rico to Kazakhstan and they range in fame from buildings celebrated by critics to house extensions and motorway service areas Taken together these essays demonstrate important research methods which yield powerful insights for designers critics and historians and lessons for students

**Precision in Architecture** Mhairi McVicar, 2019-05-13 This book offers a detailed insight into the desire for and consequences of precise communications in the daily life of contemporary architectural practice through close readings of constructed architectural details by Sigurd Lewerentz Caruso St John Architects Mies van der Rohe and OMA In the professionalised context of the contemporary architectural profession precise communications drawings specifications letters faxes and emails are charged with the complex task of translating architectural intent into a neutral and quantifiable language which is expected to guarantee an exact match between the architects intentions and the constructed result Yet as any architectural practitioner will know it is doubtful whether the construction of any architectural project may ever exactly match all written and drawn predictions This book challenges claims to certainty which have been attributed to such communications from the mid nineteenth century onwards and critiques ongoing expectations of certainty in contemporary architectural production

Forty Ways to Think About Architecture Iain Borden, Murray Fraser, Barbara Penner, 2014-08-11 How do we think about architecture historically and theoretically Forty Ways to Think about Architecture provides an introduction to some of the wide ranging ways in which architectural history and theory are being approached today The inspiration for this project is the work of Adrian Forty Professor of Architectural History at the Bartlett School of Architecture University College London UCL who has been internationally renowned as the UK s leading academic in the discipline for 40 years Forty s many publications notably *Objects of Desire* 1986 *Words and Buildings* 2000 and *Concrete and Culture* 2012 have been crucial to opening up new approaches to architectural history and theory and have helped to establish entirely new areas of study His teaching at The Bartlett has enthused a new generation about the exciting possibilities of architectural history and theory as a field This collection takes in a total of 40 essays covering key subjects ranging from memory and heritage to everyday life building

materials and city spaces As well as critical theory philosophy literature and experimental design it refers to more immediate and topical issues in the built environment such as globalisation localism regeneration and ecologies Concise and engaging entries reflect on architecture from a range of perspectives Contributors include eminent historians and theorists from elsewhere such as Jean Louis Cohen Briony Fer Hilde Heynen Mary McLeod Griselda Pollock Penny Sparke and Anthony Vidler as well as Forty s colleagues from the Bartlett School of Architecture including Iain Borden Murray Fraser Peter Hall Barbara Penner Jane Rendell and Andrew Saint Forty Ways to Think about Architecture also features contributions from distinguished architects such as Tony Fretton Jeremy Till and Sarah Wigglesworth and well known critics and architectural writers such as Tom Dyckhoff William Menking and Thomas Weaver Many of the contributors are former students of Adrian Forty Through these diverse essays readers are encouraged to think about how architectural history and theory relates to their own research and design practices thus using the work of Adrian Forty as a catalyst for fresh and innovative thinking about architecture as a subject
