Nature-based Solutions for Resilient Ecosystems and Societies Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia These disasters lead to substantial loss of life livelihoods and community assets which not only threatens the pace of socio economic development but also undo hard earned gains Extreme events and disasters such as floods droughts heat fire cyclones and tidal surges are known to be exacerbated by environmental changes including climate change land use changes and natural resource degradation Increasing climate variability and multi dimensional vulnerabilities have severely affected the social ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely impact the ecosystems and Nature's Contributions to People NCP and thereby to human well being Long term resilience building through disaster risk reduction and integrated adaptive climate planning therefore has become a key priority for scientists and policymakers alike Nature based Solutions NbS is a cost effective approach that utilizes ecosystem and biodiversity services for disaster risk reduction and climate change

adaptation while also providing a range of co benefits like sustainable livelihoods and food water and energy security This book discusses the concept of Nature based Solutions NbS both as a science and as art and elaborates on how it can be applied to develop healthy and resilient ecosystems locally nationally regionally and globally The book covers illustrative methods and tools adopted for applying NbS in different countries The authors discuss NbS applications and challenges research trends and future insights that have wider regional and global relevance The aspects covered include landscape restoration ecosystem based adaptation ecosystem based disaster risk reduction ecological restoration ecosystem based protected areas management green infrastructure development nature friendly infrastructure development in various ecosystem types agro climatic zones and watersheds The book offers insights into understanding the sustainable development goals SDGs at the grass roots level and can help indigenous and local communities harness ecosystem services to help achieve them It offers a unique essential resource for researchers students corporations administrators and policymakers working in the fields of the environment geography development policy planning the natural sciences life sciences agriculture health climate change and disaster studies **Precision agriculture '25** John V. Stafford,2025-07-08

These edited proceedings contain 181 peer reviewed papers presented at the 15th European Conference on Precision Agriculture organized by Universitat Politècnica de Catalunya June 29 3 July 2025 in Barcelona Spain The papers reflect the wide range of disciplines that impinge on precision agriculture technology crop science soil science agronomy information technology decision support remote sensing data analysis and others Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment market forces quality requirements traceability vehicle guidance and crop management Sensors now in use in agriculture are generating Big Data leading to the use of machine learning and AI an increasing challenge for agriculture Research continues to be necessary and needs to be reported and disseminated to a wide audience The broad range of research topics reported will be a valuable resource for researchers advisors teachers and professionals in agriculture long after the conference has finished **Water-Related Natural Disasters in Mountainous Area, volume II** Jia-wen Zhou,Jie Dou,Xiekang Wang,Xudong Fu,Qihua Ran,Biswajeet Pradhan,2024-03-13 In mountainous areas due to the unique geological and topographical conditions and along with the impact of global climate change extreme rainfall events often occur and induce natural disasters such as flash floods debris flows landslides dammed lakes and others These water related natural disasters WRNDs frequently occur around the world such as the July 29th 1998 debris flow and landslide dam at Capricorn Creek in Mount Meager Volcanic Complex southern Canada the flash flood of 20th August 2018 in Raganello Gorge southern Italy and the 2007 summer floods in the United Kingdom WRNDs are more serious in Southeast Asia particularly in Southwest China where many places suffer from such disasters in the flood season every year such as the May 20th 2012 flash flood debris flow among the hit area of Wenchuan earthquake the June 24th 2017 Xinmo Catastrophic landslide in Mao county and in 2018 the two sequential landslide

dammed lake events at Jinsha River These WRNDs not only cause heavy casualties and property losses but also destroy the ecological environment These WRNDs are not only the concern of government managers and engineers but also deserve more in depth study from researchers Formation and evolution mechanisms of WRNDs are very complicated and influenced by several aspects such as geological and topographical conditions hydrometeorological conditions geomaterial properties rainfall history and flow condition and others Field and laboratory tests can help us to better understand the related mechanism behind the disasters Theoretical and empirical models modeling and numerical methods can provide more reasonable evaluation and forecasting results of WRNDs but a more in depth understanding is needed Furthermore for the risk control and hazard prevention and mitigation new equipment and technologies have been developed and have achieved some progress in recent years but the fast and effective emergency treatments for WRNDs need more attention **Men,**

Masculinities and Disaster Elaine Enarson,Bob Pease,2016-06-17 In the examination of gender as a driving force in disasters too little attention has been paid to how women s or men s disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level With a foreword from Kenneth Hewitt an afterword from Raewyn Connell and contributions from renowned international experts this book helps address the gap It explores disasters in diverse environmental hazard political and cultural contexts through original research and theoretical reflection building on the under utilized orientation of critical men s studies This body of thought not previously applied in disaster contexts explores how men gain maintain and use power to assert control over women Contributing authors examine the gender terrain of disasters through men s eyes considering how diverse forms of masculinities shape men s efforts to respond to and recover from disasters and other climate challenges The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men It concludes by examining how disaster risk can be reduced through men s diverse efforts to challenge hierarchies around gender sexuality disability age and culture *Chemical Biology Editor's Pick 2024* John D.
