Abstract

This IBM Redbook® publication provides information about the concepts, planning, and design of IBM WebSphere® Application Server V8 environments. The target audience of the book is IT architects and consultants who want more information about the planning and designing of application-serving environments, from small to large, and complex implementations.

This book addresses the packaging and features in WebSphere Application Server V8 and highlights the most common implementation strategies. It provides information about planning for specific tools and components that conform to the WebSphere Application Server environment.

Also in the book are planning guidelines for WebSphere Application Server V8 and WebSphere Application Server Network Deployment® V8 on distributed platforms and for WebSphere Application Server for z/OS® V8. This book contains information about migration considerations when moving from previous releases.
